

The Chevrolet engine is the most economical automobile engine produced today, because (1) it is a six-cylinder engine, and (2) it is a valve-in-head six-

cylinder engine.

Its six cylinders use less gas and oil-in fact, use the least gas and oil - for six cylinders are the most economical combination used in modern automobiles.

Every test proves it's more economical . . . Every Chevrolet owner knows it's more economical . . . And every person will readily understand these simple A-B-C reasons why it is more economical

LESS HEAT LOSS -

THER TYPES OF ENGINES

Its valve-in-head design cuts gasoline

consumption still lower because there is

less loss of heat through the walls of the

combustion chamber in valve-in-head

engines, and the advanced construction

Most important of all, Chevrolet's more efficient cooling system, pressure stream oiling and the greater accessibility of all working parts result in more dependable operation, over a longer period of time, with the lowest maintenance costs. Thus, Chevrolet's valve-in-head engine -only one of its kind in Chevrolet's price range-gives economy without equal.

HER LOVELINESS NEVER FADED

EVANGELIST JOHN MOSES BAKER Baltimore, Maryland

"A Good Wife Heaven's Gift to Man."

Her loveliness never faded. But as fair and bright to me As the day we set sail together. Out over life's beautiful sea.

Her voice just the very sweetest, In the evening time of life, As it was in the early morning. When she first became my wife.

The heart that loves truly, loves on evermore. And the sunshine as fair and as bright. Time cannot make any changes,

As we near the harbor light. Some day in that beautiful city, When the last battle's fought and won, And the words of the Blessed Master.

Our eternal career in Heaven, Around the Great White Throne; No parting words will ever be spoken In that Land of Home, Sweet Home.
