© Maryland State Archives msa_sc3596_scm11317-0100

THE STAR.

By Thomas H. Robson.

J. H. GREENHAWLK, Printer.

EASTON, MD.

TUESDAY MORNING, AUG. 3, 1858.

Business Notices.

The large circulation of the Star renders i one of the best advertising mediums on the Eastern Shore of Maryland.

Advertisements must be handed in on Saturday morning to insure insertion in the next issue.

Newspaper Agents in the cities must send the CASH with advertisements, or they will not be inserted.

Persons wishing to subscribe to, or advertise in the Star, must address us direct, as we have no agents, and those at a distance must accompany their orders with the cash.

Dysentery is said to be very prevalent in St. Mary's county, Md.

Col. Blount, wife and daughter, left New York on Thursday for Mobile.

ERRATUM.—In publishing a list of the jury last week in the Wilson case, the name of Mr. Alexander Greenly, one of the panel, was omitted. This was purely unintentional on our part, and the fault of the compositor. Will the *Cambridge Herald*, who copied the notice from the Star *without giving the usual credit*, please make the correction.

BED BUGS.—These abominable pests can be easily exterminated by using Dr. Costar's preparations. See advertisement in another place.

FARM SOLD.—Mr. James E. Hall has sold his farm where he now resides, in Dorchester county, Md., to Mr. Nicholson, of Baltimore, for twelve thousand dollars.

PRESIDENT BUCHANAN AT BEDFORD SPRINGS.—President Buchanan, Miss Lane, Miss Bright, and Sir Wm. Gore Ousley, lady and daughter, are on a visit to Bedford Springs.

THE GOODWOOD CUP.—The great English race for the Goodwood Cup was run on the 27th of July. Charleston and Prioress were the American horses entered, and as Prioress was in fine condition, we should not be surprised to hear of her having won the race.

KANSAS ELECTION.—Yesterday was the day fixed for taking the vote in Kansas on admitting that Territory as a State with the Lecompton constitution. It is generally supposed the vote will be adverse to admission. However, there is no telling what may turn up since Jim Lane has broken down.

AUGUST ELECTIONS.—During August, elections are to be held in Missouri for Congressmen; in Kentucky for State officers; in North Carolina for Governor and Legislature. The other States which hold elections in August—Alabama, Texas, Arkansas and Tennessee, do not chose either State officers or members Congress.

THE WEATHER IN EUROPE.—A letter from Paris of July 10, says that they were then experiencing wet, cold weather that would do no discredit to the month of March, in place of the blazing sun of a few weeks previous.

INFLUX OF NEGROES.—A Washington correspondent complains of great influx of free blacks into that city, and says that they compose about one fifth of its population. Their number too is steadily increasing by daily additions from Maryland and Virginia.

LYNCH LAW IN NORTH CAROLINA.—The citizens of Weldon, N. C., having suspected a white man named Isbell with selling liquor to slaves, and buying stolen property from them, ordered him to leave the place by Tuesday evening last. This he refused to do, whereupon he was seized, tarred and feathered and escorted out of town.

THE NEW SLAVE TRADE.—According to a circular from Mr. Reed, American Minister in China, over twenty-five thousand Chinese were shipped in 1857 from that county, for the Coolie trade. The British appear to be the most extensively engaged in this trade, which is as bad as the African slave trade, for being engaged in which Great Britain threatens to invite the spoliation of Spanish territory.

THE ATLANTIC TELEGRAPH.—If the Atlantic telegraph fleet started from Queenstown on the 17th ult., the ships would, probably all reach mid-ocean in ten days, or by the 27th, and be ready to renew the attempt to lay the telegraph cable. If all goes well this time, we should hear of the arrival of the Niagara at Trinity Bay in the course of this week.

CODIFICATION OF THE LAWS.—At the last session of the Maryland Legislature a joint committee was appointed, to which was referred the subject of the revision and codification of the laws of the State, after it had been finished by the commissioners selected a few years ago. The commissioners, it appears, have now ready a considerable portion of the work, and the joint committee, therefore, are to assemble in Baltimore and organize on the 5th of August.

THE OPPOSITION ELEMENT.—Some people has smiled at the credulity of the parties who have attempted to connect the Old with the New World by means of a submarine Telegraph, says the N. Y. Sandy Hill Herald, but we deem this effort far more feasible than the one which is now being made to unite the Seward Republicans, the Fillmore Americans, the Preston King Radicals, and the Gerrit Smith Abolitionists, into an element of opposition to the Democracy.

BOOKS RECEIVED.

The following Magazines for August have been received: Godey's Lady's Book; Graham's Magazine; The Atlantic Monthly; Household Words; Arthur's Home Magazine; & Petersons Magazine. Also Blackwood's Magazine, and Emerson's Magazine & Putnams Monthly, for July. These all contain their usual variety of miscellanous reading.

PETERSON'S COUNTERFEIT DETECTOR, announces the appearance of *thirty new counterfeits* since the 15th of July. This reliable detector is doing good service in exposing the flood of counterfeits which are overruning the country. No business man should be without it. Issued monthly at $1 a year, and the semi-monthly at $2. The semimonthly Detector is much to be preferred, in view of the great number of counterfeits that are appearing weekly. Address T. B. Peterson, No. 306 Chestnut street, Philadelphia.

MARYLAND STATE AGRICULTURAL SOCIETY'S CATTLE SHOW.—We have heretofore announced, says the Balt. Sun, the time fixed for the Cattle Show of the Maryland State Society. It so happened that the United States Society had at the same time fixed upon the same week for their show. The executive committee of the Maryland Society have consequently reconsidered the subject, and have now, we learn from the general secretary, fixed upon the period one week earlier; viz: to commence on the 19th of October, and to be continued four days. as usual.

THE UNITED STATES JOURNAL.—We invite special attention to the magnificent list of Premiums advertised in the Prospectus of the United States Journal, by Messrs. J. M. Emerson & Co., No. 406, Broadway New York. The *Journal* is an admirable literary paper, and the cheapest one published in the country, to say nothing of the premiums which are offered with a view to extend its circulation.—See advertisement in another column.

BALTIMORE ADVERTISEMENTS.

REESE'S MANIPULATED OR PHOSPHO—PERUVIAN GUANO.—In our advertising columns this morning, will be found the advertisement of Messrs J. S. Reese & Co. of Baltimore, whose Manipulated guano is now taking precedence of the pure Peruvian, wherevever it has been tried. In Dr. Higgins' Reports, and, in fact, in all of the reliable works on fertilizers, the farmer will see that, whilst the Peruvian guano has a superabundance of ammonia, it is deficient in phosphates, and while the Mexican and Columbian guanos contain a large amount of phosphates, they are rather deficient in ammonia. These experts in agricultural chymistry, therefore, recommend a combination of the Peruvian and Mexican guanos, in order to obtain an equal and proper proportion of ammonia and phosphates, as the cheapest and best preparation for all kinds of crops. The Manipulaled guano is simply just such a combination of the two guanos as the farmer makes in his own barn; with this advantage:—it is *thoroughly prepared for immediate use*, with the greatest skill, and the most improved machinery, such as no farmer possesses. In short, the Manipulated guano is the very article the best writers recommend, and the very article the farmers need, and the high character of Messrs. Reese & Co., gives assurance that those who purchase of them will not be cheated. We invite special attention to their advertisement.

A. MATHIOTT'S FURNITURE EMPORIUM, No. 25 & 27 NORTH GAY ST, BALTIMORE. This establishment is noted as one of the very largest of its kind in the United States, and Mr. Mathiott deserves great credit for the enterprise he has exhibited, in the race which has enabled him to distance all competitors. While other furniture dealers were suffering from the pressure last Fall, Mr. M. was driving a profitable trade, the result of his forecast, in advertising liberally during the previous Summer. His establishment has now become famous, and persons from all parts of the State visit it daily, not only to examine and purchase bargains in furniture, but to take a view of the city from his observatory, in the seventh story of the spacious building he has completely filled with every variety of furnitnre, from cellar to steeple. Withal, he is one of the cleverest fellows in Baltimore, and will be so esteemed by all who make his acquaintance. We invite attention to his advertisement in another column, and advise all who visit the city from these parts to call on him and take a look at his establishment.

HOPKINS' CHALYBEATE WATER—NATURE'S OWN REMEDY.—We invite special attention to Dr. J. V'D. Stewart's advertisement of "HOPKINS' CHALYBEATE WATER, which will be found in another column of to-day's *Star*. It will be seen that the most eminent physicians of Baltimore have pronounced it well adapted to cases of Dyspepsia, Anemia, and General Debilty, and the numerous certificates given by those that have used it with great benfit, fully confirm the opinion expressed by the physicians as to the wonderful curative properties of the water. We are credibly informed that such is the success that has attended its use, that in Baltimore city alone, the sale of it amounts to several hundred bottles daily. There is one thing about it which cannot be said of every medicine: *if it does no good, it will do no harm*. We have said thus much simply with a view to direct the reader's attention to the advertisement which fully sets forth its merits, and which we hope none will fail careful to examine. We believe the water may be had of our apothecaries; if it cannot, persons in this section can easily obtain it of Dr. Stewart, the General Agent, south east corner of Hanover and Camden Streets, Baltimore. We have no doubt that the water from this extraordinary well is destined at an early day, to attain great celebrity throughout the country as a remedial agent of the first character. Let the afflicted drink freely and be healed.

RATS.—Mr. Charles Robinson, Easton, is the agent for the sale of Dr. Costar's infallible Rat, Roach, and Bed Bug Exterminator.

THE PILL TRADE.—Who could dream of the magnitude such an undertaking as the manufacture of a Purgative Pill assumes when it comes into general use.—And how painfully do the following numbers speak of the amount of human sickness and suffering, that little morcel of a remedy goes fourth to combat and subdue Dr. J. C. AYER of Lowell, manufactures in his laboratory forty gross per diem of his *Cathartic Pills*, through all the year. This is eight boxes a minute or one dose a second. We thus find over 43,000 persons swallow this pill every day, or 1,296,000 a month. Physicians, think of that! 43,000 patients a day who seek relief from the medical skill of one man. Surely that man should be, as he is in this case one of the first intelligence and of the highest character. His occupation entail's upon him a fearful responsibility for the weal or woe of his fellow man. *Painsville Courrier.*

WHAT SHALL BE DONE?

It seems to be a matter of very little concern indeed, to our citizens, by what means their slaves make their escape.—Last year when they were running off, almost weekly, by scores, a small part of the people of this county were somewhat aroused from their apathy, and held meetings for the purpose of adopting a plan by which runaway negroes could more reaily be intercepted, and their line of travel found out; but with the second or third meeting the whole scheme was abandoned and the thing forgotten. It is a matter of impossibility, and it is foolish to expect the slaves to be what they should, where a set of idle lazy and theiving free negroes are allowed to remain among us, and, by their bad example, poison the minds of the slaves. If we expect the slave to be worth anything, we must get rid of the worthless free negro, and the sooner it is done the better. There is no doubt but there are some white persons in the community who assist in getting off the slaves, and we think that with a proper diligence on the part of our citizens they might be discovered: and if a thorough coat of tar and feathers would not be a sufficient inducement for them to take their leave of us, why then they could be dealt with in a more summary manner. An example of this sort would be, we have not the least doubt, productive of good results. We hope our citizens will take the matter in hand, and make another, a bold effort to break up this underground railroad and to bring to justice the conductors of it.—*Cambridge Democrat.*

LATEST FROM CALIFORNIA.

Arrival of the Moses Taylor—the Fraser River excitement Inian Troubles, &c.

NEW YORK, July 27.—The steamer Moses Taylor has arrived from Aspinwall, with California dates to the 5th instant, and $1,000,000 in specie. She also brings two hundred passengers.

The Fraser River excitement was unabated. The reports received from that quarter are marvellous. One letter writer says his first day's yield was seven hundred dollars. Victoria was crowded with Americans, and building lots were held as high as $20,000.

The Hudson Bay Company are buying gold dust at $15 per ounce.

The Indians had begun to molest the emigrants, and a party of ten had been attacked, of whom six were killed. Twenty-two canoes, filled with Indian warriors, were passed going into Victoria, and two hundred more were on their way. The mining region seems to be over-run by them, and an indiscriminate massacre will, no doubt, follow.

Fourteen steam and sail vessels left San Francisco for Frazier river during the past fortnight.

Eastern flour has advanced $1—sales of Haxall at $13.50.

The Upper Columbia and Oregon Indians were collecting in large numbers.

The Oregon election had resulted in the choice in the whole Democratic ticket.

The command of the Department of the Pacific was hurrying all the troops under his command to protect the inhabitants from the Indians. The number and equipments of the troops were wretchedly inadequate.

The line of steamers between Aspinwall and Havana has been discontinued, and hereafter the steamers for New York will stop at Key West.

The United States frigate Saranac was to leave Panama on the 10th for San Juan.

Bolivia was at last accounts quite unsettled. The government was in great dread of the return ot Belzu. President Linares was very unpopular He had banished many of the best citizens, and others were selling their estates and leaving for Peru.

Advices from Carthagena announces the rejection of the Cass-Herran treaty by Congress. A bearer of dispatches for the government came by the steamer.

The Supreme Court of California have decided that the Sunday law is unconstitutional. The prosecutions under the law had accordingly been abandoned.

The Massachusetts House, and the warehouse of Messrs. Bowen & Brothers, at Stockton, have been burned.

Business at San Francisco continued unusually active. Large operations have taken place in provisions and other goods used at the mines, at a heavy advance.

NARROW ESCAPE.—We learn that a negro man belonging to Wm. C. Huffington, Esq., near this town, while engaged in threshing out wheat last week, was caught in the rods of the thresher, and carried over some twenty or thirty times, striking the ground every turn, before the horses could be stoped. His clothes were torn into ribbons. It is wonderful that he escaped alive, but he did without having any bones broken, though badly bruised. He is in a fair way of soon recovering.—*Cambride Herald.*

WONDERFUL TURN OF GOOD LUCK.—We see by the Charleston papers that a Mr. Heinrich Peters, a resident in that city and fireman on the Charleston and Columbia (S. C.) Railroad, drew the second capital prize in the single number lottery of Samuel Swan & Co., of Augusta, Ga., and thus acquired a fortune of $30,000.—*N. Y. Courier*

NEGRO STAMPEDE.—On last Wednesday week a negro man of Dr. Tubman's, and on last Saturday night a negro woman and two boys, the property of Mrs. Dixon of this place, and a negro man and woman belonging to R. E. Phillips of Town Point, ran away. There is a reward of a thousand dollars offered for their capture.—*Cambridge Democrat.*

ARRIVAL OF THE EUROPA AT BOSTON.

Mistrust of France by England---Gold from Australia—The Massacre of Christians—Rejoicing of the Musselmen, &c,

BOSTON, July 28th.—The Europa has reached this port. Her files contain the following additional news,

ENGLAND.

The London Times' city article attributes the inactivity in all kinds of securities to the mistrust as to the future peaceable intentions of the Erench government, and says the financial world are entitled to demand of Mr. D'Israeli whether he will not on their behalf turn his confidential position with the Emperor to account, and brings about an understanding for a general return to the peace standard, which may enable them to proceed in their accustomed track, and enjoy on all sides a renewal of prosperity.

The Shooting Star, from Melbourne, had arrived, bringing £166,000 in gold making the receipts of the week £710,000. Two other ships are about due with £400,000 more.

The case of Lady Lytton Bulwer had been adjusted to the satisfaction of all parties, and on the special report of her ladyship's condition she had been set at liberty.

In the Commons the Jews' bills, as received from the Lords, was passed to a second reading

FRANCE.

The Paris papers generally deny the assumption of the London Times that the fortifications at Cherbourg are intended as a menace to England.

PRUSSIA.

It is said that the health of the Princess Frederick William will not admit of her meeting her mother at Cologne, and that Queen Victoria will consequently go to Potsdam.

ITALY.

The election in sardinia to fill vacancies were generally favorable to the government.

RUSSIA.

St. Petersburg letters says that the military character of the administrative system for Poland is about to be superceded by a new system, in which the cival element will predominate.

TURKEY.

The Porte has sent 2,000 troops to Djiddah to inflict exemplary punishment on the murderers of the Christians. When the news of the masacre reached Mecca the Musslemen held a rejoicing.

From Athens it is stated that a terrible reaction by the Musselmen against the Christians had taken place in Candia.—The European consulate and the Catholic church in Candia had been attacked and the Christians were leaving the city.

INDIA.

Disarming proceeds quietly on both sides of India. The disarmed Sepoy regiments had been discharged in small parties. The Rajah of Ramsee's palace and the town had been plundered by the rebels. The rebel garrison of Humeaper, numbering 5,000 guns, escaped pursuit.—Letters report that the heat produced great sickness among the the troops, and with all the reinforcements sent out, only 20,000 Europeans could be mustard.

Latest by Telegraph.

LONDON, Saturday, July 17.—The Times City article reports an improvement of an eight in the funds yesterday, but closing rather less firm.

The Daily News reports the market firm, owing to recent *bona fide* investments. But small buantities of gold were taken from the bank for the continent, owing to the non-deliverance of the Australian arrivals.

Special Notices.

HOLLOWAY'S OINTMENT AND PILLS.—The skin diseases to which the *bon vivant* and man of indolent habits are peculiarly subject, as well as those scorbutic affections caused by a superabundance of salt diet and the hardships and privations of a seaman's life, are readily removed by Holloway's Ointment. The disfiguring blotches, pustules, pimples, etc., arising from suppressed perspiration or obstructions in the secretive organs, are also immediately obliterated by this purifying and beautifying agent. It has no equal as a means of cleasing the complexion and relieving the skin of discolorations and excrescences. The Pills, as they carry off all inward impurities, are an important auxiliary to the Ointment in such cases.

A CURE BY OXGENATED BITTERS.

Burlington, Vt., Nov. 12, 1854.

Gentlemen: I suffered for about a year previous to last Spring, from a derangement of the action of the heart, which like most others similarly afflicted, I supposed to be an organic disease, and having seen the Oxygenated Bitters highly recommended for use in such cases, I procured and used a single bottle, with entire success.

The disagreeable symptoms speedily disappeared, and I have never had any recurrence of them.

Being really of opinion that this medicine is of enquestionable value as a cure for dyspepsia, (in which opinion I am happy to know that I agree with many intelligent physicians,) I have no hesitation in permitting this certificate to be used in any way that will promote its more general use.

E. A. STANSBURY,
Editor of the Burlington Courier.

DIED

In Baltimore, on the 27th inst., SAMUEL, aged 3 years, son of JNO. R. and the late J. T. Blake.

At "Evergreen," the hospitable home of Dr. W. G. G. Willson, on Sunday morning, the 25th ult., LEVIN HICKS, infant son of Levin H. and Mary P. Campbell, aged 1 year, 3 months and 18 days.

"Beautiful thing, with thine eye of light,
And thy brow of cloudless beauty bright,
Gazing for aye on the Sapphire throne,
Of *Him* who dwelleth in light alone;
Art thou hastening now on that golden wing,
With the burning Seraph choir to sing?
Or, stooping to earth in thy gentleness,
Our darkling path to cheer and bless?

Beautiful thing! thou art come in love,
With gentle gales from the world above;
Breathing of pureness, breathing of bliss,
Bearing our spirits away from this,
To the better thoughts, to the brighter skies,
Where heaven's eternal sunshine lies,
Winning our hearts by a blessed guile,
With that infant look and angel smile.

Beautiful thing! thou art come in joy,
With the look, with the voice of our darling boy;
Him that was torn from the bleeding hearts
He had twined about with his infant arts,
To dwell from sin and sorrow far,
In the golden orb of his little star,
Here he rejoiceth in light, while we
Long to be happy and safe as he.

Beautiful thing! thou art come in peace,
Bidding our doubts and fears to cease,
Wiping the tears which unbidden start
From the bitter fount in the broken heart,
Cheering us still on our lonely way,
Lest our hearts should faint or our feet should stray;
Till risen with Christ we at least shall be,
Beautiful thing with our boy and thee!"

Agricultural Notice.

THE Trustees of the Maryland Agricultural Society for the Eastern Shore, will hold their next regular meeting at "Riverslie," the residence of H. C. Tilghman, Esq., on Thursday next, the 6th inst.

By order,
E. L. F. HARDCASTLE,
Aug 3 It Secretary.

FOR SALE.

SIX beautiful *thorough-bred* DEVON BULLS, three of them 18 months old; the balance this Spring's calves.—Price, 60 and 75 dollars—delivered at Easton.
HENRY J. STRANDBERG,
"Brookletts," near Easton.
Aug 3 4w*

Fresh Fruit.

AS the season for preserving Peaches, Tomatoes, &c, is now approaching, the subscriber has now provided a large stock of all the various and most approved Jars for the purpose, which he offers at the lowest prices:

He is also agent for the county for Dayton's Patent for "*Exhausting the Air*" from Fruit Cans. This Exhauster can be used to advantage on most of the fruit cans now in use, the only alteration necessary being the punching of a small hole in the centre of the lid. Persons generally, are invited to view this curious and useful invention which exhausts the air from the fruit can and seals it at the same time.
aug 3 JNO: GOLDSBOROUGH.

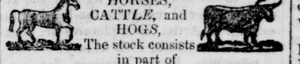

GAS FOR ALL.

THE Patent Portable Gas Machines, manufactured by the Maryland Portable Gas Company, of Baltimore, are particularly adapted to the use of *private dwellings, churches, hotels, towns, &c., &c.* They furnish a light *cheaper than oils or candles, perfectly safe*, and requiring no more skill and intelligence in the management than an ordinary cooking stove or furnace. For terms and other information apply to
A. MATHEWSON, Local Agent,
aug 3 3t Easton, Md.

Wesleyan Female College.

WILMINGTON, Del., July 20, 1858.

To the Friends and Patrons of "Wesleyan Female College," Wilmington, Delaware.

The trustees would respectfully announce that the college has maintained her established reputation during the past collegiate year, for imparting a sound, moral and thorough education to those placed under her care.

The general health of the young ladies has been excellent.

The late President having resigned his position in the College, the Trustees have taken measures to supply efficiently the place which has been vacated, and the next session will open promptly on the first of September, 1858, under the Presidency of Rev. JOHN WILSON, A. M., late Principal of the Female Collegate Institute, Staunton, Va.

The Trustees with great confidence, recommend the College to the continued patronage of its friends and the public generally.

EXPENSES PER QUARTER.

Board, including room-rent, bedding, lights, fuel, free use of bath rooms and gymnasium, $28; Washing and ironing, per dozen. 40 cts. Tuition for studies in course, $10; Lessons on the Piano, $10; Use of instrument, $2; Tuition in Modern Languages, each $6; Lessons in Penciling, $5, in Monochromatic and colored Crayon $6; in Oil Painting, $8; Stationary and use of library, $1. Board and tuition Bills are to be paid *in advance*.

The officers of the College are—Rev. Jno. WILSON, A. M., President, and Rev. T. J. THOMPSON, General Financial Agent, either of whom may be addressed for further particulars, or catalogues.

Signed on behalf of the trustees,
FRANCIS HODGSON, Pres't. pro. tem.
D. M. BATES, Secretary. [aug 3–2m

HOPKINS' CHALYBEATE WATER.

THIS is the title of a Mineral Water obtained from a well upon a farm of Mr. Wm. Hopkins, in Baltimore county, Md., within 15 miles of the city of Baltimore, and 1 mile of the Philadelphia, Wilmington and Baltimore Railroad. The well was dug in 1855, and is 80 feet deep; the water standing within 8 feet of the surface of the earth. Numerous experiments made in order to test the supply of water, only confirm the opinion that it is inexhaustible.

The soil in which the well is dug, is a tenacious red clay, variegated with frequent strata of Magnesian Earth, and the water rises through the original sand stone rock.—Its temperature when drawn from the well is 52 deg. Fahrenheit.

This water has been extensively used by invalids for nearly two years, and has acquired great celebrity as a curative in Dyspepsia, loss of Appetite, Indigestion, Extreme Debility, and in various Atonic and Anemic conditions; through the instrumentality of those who have been signally benefitted by its use.

Its most prominent ingredients according to a recent qualitative analysis are Carbonate of Protoxyed of Iron, and Free Carbonic Acid Gas.

It also contains Carbonate of Magnesia, Chloride of Magnesium, Chloride of Potasum, Chloride of Calcium, Carbonate of Lime, *a trace*, and what is remarkable, *no Sulphur*.

A water combining such ingredients will at once be recognized by Physicians as a valuable Remedial Agent, and being pleasant to the taste, and no ingredient contra-indicating its use as a common drink, it will doubtless become a popular Beverage.

DIRECTIONS FOR USE.

The entire contents of a bottle may be drank before breakfast, and the same quantity, if desired, before dinner or at bed-time; thus used it has been found to give tone to the stomach, and to improve digestion to a remarkable extent.

The opinions of some our most eminent Physicians, and other prominent citizens are annexed, and will abundantly establish what is above stated.

CERTIFICATES & TESTIMONIALS.

To J. V'D. Stewart—Esteemed friend: I have a very favorable opinion of Hopkins' Chalybeate Water, and believe it to be well-adapted to many cases of Dyspepsia, Chlorosis, Anemia, and General Debility.

Respectfully,
Richard H. Thomas, M. D.,
Professor in University of Maryland.

We cheerfully concur in the opinions expressed by Dr. Thomas:

N. R. Smith, M. D., Prof in University of Md.; John P. Mackenzie, M. D., J. H. Patterson, M. D.; G. W. Miltenberger, M. D., Prof. in University of Md.; John Buckler, M. D.; G. S. Gibson, M. D.; T. H. Buckler, M. D.; F. E Chatard, M. D.; Samuel Chew, M. D., Prof. in University of Md.

I have found Hopkins' Chalybeate Water a very valuable agent in the treatment of diseases in which Iron is indicated. It certainly possesses many advantages over Iron prescribed in other forms.

D. I. McKew, *M. D.*
To J. V'D. Stewart.

I have used Hopkins' Chalybeate Water in my family with the most decided advantage.
Henry V. D. Johns;
Rector of Emanuel Church Balto.
Baltimore, March 3d, 1857.

I have used Hopkins' Chalybeate Water in my family in a case of extreme debility, with decided advantage and the greatest satisfaction. J. Alexander Shriver,
Agent of Balt. and Phila. Steamboat Co.
Baltimore, March 3, 1857.

I have received the greatest benefit from the use of Hopkins' Chalybeate Water.
Mary E. Banning.
Baltimore, March 3, 1857.

I have used the Hopkins' Chalybeate Water in my family with decided benefit.
Basil T. Elder,
No. 206 N. Charles st.
Baltimore, March 7, 1857.

I consider the Hopkins' Chalybeate Water as of great value, especially in cases of extreme debility. It has been used by an aged member of my family with decided benefit.
W. A. Talbott, No 42 St. Paul St.

I have used the Hopkins' Chalybeate Water in my family in a case of extreme debility with the most happy result.
S. N. Hyde, Broadway.
Baltimore, April 11, 1868.

I think highly of the virtues of *Hopkins'* Chalybeate Water. It has been used at different times by several members of my family with benefit. John G. Proud,
Insurance Agent. No. 63 Second street.
Baltimore April 21, 1858.

To meet the constantly increasing demand for the water, the subscriber has perfected arrangements involving a large outlay of capital, which will enable him promptly to fill orders to any amount. The Water is bottled at the well in new bottles, made expressly for it, branded "Hopkins' Chalybeate Baltimore," securely corked and copper wired, and will be delivered, free of charge, to all parts of the city, and to the several Railroad Stations and Steamboats, and will be sold at the following prices, to which he invites the attention of the community and the trade.

No charge for Packages. 37½ cents per dozen ($4.50 per gross,) will be allowed for empty bottles, packed, and in good order, delivered at my store.

Orders from the city and from a distance, enclosing draft for amount ordered, will receive prompt attention if addressed to
J. V'D. STEWART, Chemist,
Sole Agent, S. E. corner Hanover and
aug 3 Camden sts., Baltimore.

PUMPS, PUMPS.

THE subscriber informs the citizens of Easton, and all others who may want the services of *an experienced Pump Maker*, that he is prepared to put down the old fashioned

Stock Pumps,

to order, and warrants his work done in the best manner. After all that has been said about the new fashioned pumps, the old stock pump cannot be superceded. They are the best and most durable pump in use.

When not in Easton, all orders left with T. B. Merritt, of the Union Hotel, will be promptly attended to.

PRICES:

25 cents per foot for making the stock; $3 for buckets and spouts, if in two pieces, $1 for the joint. 50 cents per foot for Well-Digging and Bricking; $1 50 for the cylinder.

Prices moderate for Repairing old Pumps.
