Tearing "PLOW-SOLE" to Pieces on a GALLON of FUEL per Acre!

Nine stiff-shanked chisel points ripping 10 inches deep—it's a heavy-duty load to make or break a tractor's reputation! Watch the "Caterpillar" Twenty-Two Tractor do this tough work on one gallon of low-cost fuel per acre—and chisel 2½ acres an hour—and stay at it as many hours as the acres last!

ASK US FOR FURTHER INNFORMATION ON THE COST-CUTTING, TIME-SAVING ADVANTAGES OF "CATERPILLAR" TRACK-TYPE TRACTORS — DIESEL, DISTILLATE OR GASOLINE MODELS!

Traction of broad, gripping tracks is one reason for such performance. And behind this traction is correct distribution of this tractor's ample weight—there's no "rearing" or "heeling" on heavy pulls . . . Add to non-slip traction an engine built to power so strong a tractor — with positive, double-pump lubrication—and a cooling system to beat the twin handicaps of hot weather and big loads . . . Then for extra measure, simplified design for efficient transmission of power—fewer yet stronger parts—alloy steels heat-treated the "Caterpillar" way to defy wear and breakage!
