Patent Horizontal Wind-Mill.

THE subscriber offers to the gentlemen farmers and others of Maryland, and the other states, an invention, which for utility has not been exceeded by any piece of mechanism which this or perhaps the last century can boast of. Its aptitude to all those various and useful purposes, will be more easily and justly estimated by a view of the machine itself, than from any description that can be given here. —A model of this wind-mill can be viewed on Federal Hill, where it is kept for the convenience of shewing it in operation, by applying to Mr. Marche, No. 4, south Gay-street, by whom also the terms will be made known for the model only to erect a mill by, or for the patent right for a whole state; or by
