course of the upper part of the river, the most are at the Northwardly part. From where they wintered to the falls, is nearly a South course. The description given by M'Kenzie, of the head waters of the river, is accurate.

They have sent on to the president of the United States, an accurate journal, with a map of the country through which they passed.

Six of the party were sent back; the party now consists of 28 men, exclusive of the two officers. They have enjoyed perfect health; not one having been sick, except the unfortunate young man before mentioned, and he was taken off in a few hours with a cramp in his stomach. The greatest friendship has existed with the party; and the men who have returned, speak in the highest terms of the humanity, and uncommon pains and attention of both the captains, Lewis and Clarke, towards the whole of them; and that they left them in good spirits, fully convinced that they would winter on the pacific Ocean.

They were told of six nations of Indians they would have to pass, before they would arrive at the falls, from only one of which, they apprehended any difficulty; they are called the Snake tribe, and reside high up.

Curiosities of different kinds; live beasts, birds, several boxes of minerals, a pair of uncommon ram's horns, from the Rocky mountain, scions of a new discovered berry, called the buffaloe berry, &c. have been bro't on by the returned party, and deposited with the commanding officer at St. Louis, to be sent by him to the president.

We expect in a few days, further particulars relative to this interesting voyage.

On Thursday last, Mr. Thomas Nelson, a merchant of Brackin county, who was returning from Orleans with a considerable sum of money, which he had secreted in a belt round his body, who stopped in Harrison county, near the forks of Georgetown and Lexington roads by 2 men who robbed him of 3200 dollars, in gold and bank notes; and tied him to a tree, where they left him until a Mr. M'Mullin, who had travelled in company with him from the Chickasaw nation, and who had fallen some distance behind in consequence of his horse being lame, came up and set him at liberty. One of the robbers was armed with a pistol, the other a knife and stick, with which he struck Mr. N. a severe blow on the back of his head and neck. Mr. Nelson's name is endorsed on the notes: A reward of 100 dollars is offered for each of the villains.

PHILADELPHIA, July 9.

Our correspondent at the Lazaretto of the date of yesterday noon, says, this morning arrived, brig Hope, Thomas, 23 days from St. Thomas; schooner Olive Branch, Harper, 26 days from Trinidad, via St. Thomas. Captain H. left at St. Thomas, chooners Chance, which arrived the day before he sailed. The captain of the Chance said he was fallen in with and detained 5 hours by a French fleet, in lat. 23, who were then steering north-west. Captain Harper says the English fleet were at Trinadad, when he sailed. He also informs, that the cook of the Louisiana was at St. Thomas, and said that the Louisiana was taken by two French privateers, and sent into St. Martins, that 9 of the people were killed and a number wounded, but could not say how many—the remainder of the crew were sent in a vessel to New-York.

Various letters from Hispaniola, lead us to believe that the Louisiana would not sail from Gonaives before the begining of the present month; if so, we are led to hope the above was the fabrication of some fellow who passed for the cook, and told the above to serve some sinister purpose.

Extract of a letter, dated Trinidad, 10th June.

A large fleet appeared off Tobago some days ago, which was taken for the French fleet, and all the shipping cleared out as fast as they could run with the Proselyte frigate—called off here *en passant* in the course of the day. The 7th, a signal for a fleet of 22 sail was made, and not a doubt remained but it was the fleet from Martinique; every man was under arms and at his post. In the course of the afternoon, they came into the bay, and anchored at sun set, near enough to distinguish what all the ships were.—Every preparation was made to receive them next day to a certainty; when we found with surprise, it was admirals Nelson and Cochrane, with 12 sail of the line and ten frigates, with the commander in chief on board, (general Myers) the chief engineers from Barbados, a heavy train of artillery and 2000 men. On lord Nelson finding we could give him no information of the French fleet, he went off in the course of the day in quest of them, and I hope will find them; though it is probable they may be still at Martinque. If so, and he is joined by sir Thomas Graves, both the ships and the island will fall into his hands.

TOULON FLEET.

Captain Rowan, whom we mentioned in our last as having met with the Toulon fleet, has arrived in town. He informs that it was on the 15th or 16th of June, in latitude 27, 30, longitude 60, that he fell in with the fleet, steering N. and by E. It consisted of twenty two sail, eleven of which, he understood to be of the line—that the Spaniards had left them is a matter of conjecture only. On the 18th June, in lat. 30, long. 64, captain R. was boarded from the British sloop of war Driver, the officer from which was particular in his enquiries respecting the fleet.

In the straits of Sunda, captain R. spoke the Hector and Fame, of Salem, and *Elizabeth, of Baltimore, from Batavia for Calcutta,* not being able to procure cargoes at the former place. [*Bost. Palad.*]

LAUNCH.

Yesterday at 11 o'clock, was launched from the ship-yard of Mr. Marsh, Southwark, the elegant copper-bottomed brig Hibernia, the property of Mr. John Meany, and intended for the Canton trade. Competent judges pronounce this vessel to surpass in beauty of structure, and excellence of workmanship, any other of the size ever built in this port. It is expected she will be a remarkably fast sailer.

June 18, lai. 37, long. 69, *schooner John & Elcy, Watts, 6 days from Baltimore, for Barbados.* 27th, lat. 27, long. 73, brig Vigilant, 16 days from Havana, for Boston. 28th, lat. 36, 45, long. 72, 30, ship Hannah, Yardsley, 48 hours from Philadelphia, for Jamaica.

Also, schr. Lucy, Ellis, 16 days from Martinique, for Boston. Spoke, June 20, lat. 26, long. 68, his Britannic majesty's ship Cambrian—Two days before she had taken a Spanish privateer, of 14 guns and 67 men; she attacked the privateer in a calm with her boats, and after an action of two hours, carried her with the loss of 6 or 7 men. 21st, lat. 27, long. 69, brig Sally and Mary, 11 days from Wilmington, bound to St. Thomas. 22d, lat. 29, long. 71, *brig Henry, ——, from Baltimore, for Guadaloupe.*

CANANDAIGUA, June 25.

DETROIT IN ASHES!

A letter from a gentleman of respectability at Buffaloe Creek, dated the 20th inst. to his friend in this town, contains the following distressing intelligence:

"By the schooner Charlotte, captain Nixen, who arrived at Fort Erie yesterday, we are informed that the whole town of Detroit is totally consumed by fire, not a single house in town left standing!

"The fire, it is said, first made its appearance in a stable near the centre of the town, about 9 o'clock in the morning, and such was the rapidity of its ravages that at 12 o'clock not one house remained. The citadel, which was rather detached, and in which were the arrock's, officers and contractor's stores, was entirely consumed."

Note.—Detroit is the seat of government of the Michigan Territory, and contained upwards of 300 houses, built of wood, in a compact manner, and about 2000 inhabitants.

FEDERAL GAZETTE.

WEDNESDAY, JULY 10.

A letter from Glasgow says, "trade has been very brisk for the last month, hands are very scarce, and wages have got up; the manufactures of this place and Paisley have been exported to a great extent, particularly to America and the West-Indies. Since Louisiana came into the possession of the United States of America, our demands for that country have increased rapidly; and with the importation of raw materials for our manufactures, such as cotton, ashes, Indigo, &c. Great qnantities of gold and silver specie have been imported both here and at Liverppol, London &c. from America, within the last twelve months, to the amount it is supposed, of three or four millions of dollars."

Inventions and Improvements.

A MACHINE has been erected in the city of Baltimore for the purpose of COLORING HATS, by the operation of which is saved half the time, half the fuel, one-third of the die stuff, and nine-tenths of the labour, with a number of other advantages, all of which, the subscriber pledges himself to make appear on investigation. As this machine has been a matter of investigation, and by impartial judges declared to be effectual, he feels himself bound to make every effort to prove its efficacy to all those who may still have any doubts. It must be to the interest of the hatters in the United States, to adopt this mode of colouring, which will do away the most disagreeable part of that branch of business.
