TO BE SEEN,

Two Dromedaries,

FROM ARABIA.

THESE are the first of the species ever imported into this country. The value of them is such, that the Arabian possessed of his Dromedary, has nothing either to want or to fear. They will travel at the rate of an hundred miles in a day, 5 or 6 days together, without either eating or drinking. They are part like the horse, cow, sheep, and the rabbit, and are the most docille animal in the world. They kneel down, take on their load, and wait the pleasure of their keeper to rise. They arrive at their full growth at 6 years old, which is about 20 hands high, and live to the age of 40 or 50 years. The oldest of the above is forty years, and the youngest seventeen months

These astonishing animals are to be seen at No. 36, opposite the lower end of the Marsh-market, in a clean place. It is to be hoped the Ladies and Gentlemen of Baltimore will not lose this opportunity, which may be the only one (at least for many years) of viewing these surprising animals, so much spoken of by naturalists and historians.

Admittance 25 cents, children half price.

RAN-AWAY from Thomas Linthicum onthe 30th March last, a few days before he removed to the Western Country, a tolerably dark mulatto woman, named MIMY, 30 years of age, 5 feet 3 or 4 inches high, rather slender made, her cloathing unknown, as she has been gone a length of time; has a bushy head of hair, lost one of her fore teeth out of her upper jaw, near the eye tooth; it is supposed she has a young child, or now about in the straw, as she was young with child when absconded. She has a husband, the property of Zacheriah Maccubin, who lived near where she went from, until the 3d November last, and then he absconded: no doubt they are both together: the fellow is black, named FRANK, 43 years of age, 5 feet 7 or 8 inches high, stout made, has been a miller a number of years, is a good weaver, and is handy about plantation work. It is supposed they have changed their names, and have obtained passes, and will endeavor to pass as free people. As the man is a very smart fellow, he may get in some mill. The woman has been seen in Baltimore on Federal-hill, all summer, but now it is said she has removed to a part of the town called Old-Town. Literary and Commercial SEMINARY,

Second door from the north-west corner of North, and Lexington-streets,

FOR BOYS BETWEEN THE AGES OF SEVEN AND TWELVE YEARS.

THE superior pleasure derived from unfolding the infant mind; the flexibility of early youth; the force of first principles and habits; and the difficulty of correcting more advanced age, are the reasons which have induced the subscriber, to wish to confine his labors to so young a part of the community.

The advantages resulting from associating together, boys of nearly the same age, must, he conceives, be obvious to every one: thereby any number may be more effectually taught; greater emulation will be produced, and their morals rendered less liable to be corrupted.

The subscriber who has taught in some of the first academies in Great Britain, has, for the last twelve months, been engaged in a respectable female academy in this city; where, although his labors have been necessarily confined, yet he flatters himself, sufficient has been done to convince the public of his ability, for the proposed undertaking.

Parents desirous that their sons should complete their education at college, will here have an opportunity of having them early qualified for that purpose; as in this institution will be taught, in addition to other branches, the Latin and the elements of the Greek language, together with so much of Mathematical Science, as may be adapted to their tender capacities; but especially, care will be taken to make the youth read, write and speak the mother tongue with propriety, elegance and correctness.

A proper person will be engaged to teach the French language.

To illustrate the sciences of Geography and Astronomy, an elegant pair of Globes are procured, to which will be added Maps, Charts and appropriate Diagrams.

In order to make an amusement, rather than a toil of teaching, and to obviate the inconveniences attending crowded academies, in which a great part of the business must devolve on persons having only a secondary interest, it is determined that the number of pupils shall on no account whatever exceed *twenty-five.*
