MR. LE TELLIER DENTIST.

INFORMS the inhabitants of Baltimore, that the Perpendicular instrument that he makes use of, for extracting Teeth, is one invented by himself since he has been in this city, and its utility is equal to the Patent Perpendicular instrument, which instrument Mr. Le Tellier has used with great success in most of the cities to the South of this.

By some persons (who know not the manner of operating with Bruff's Patent Instrument) it has been said that the said instrument could not be used in all cases, Mr. Le Tellier has made observations in the course of his practice, and has found it answer for two thirds of the cases which offer, and no instrument that has ever been invented can be used to every tooth, but according to the situation of the teeth to be operated on so an instrument must be adapted.

He continues to operate in every other branch of Dentistry, and particularly in setting ARTIFICIAL TEETH so as to stand firm, and in excellence and beauty so as not to be distinguished from natural by the examining eye of the most curious.

He has DENTIFRICE of a very superior quality which he has lately prepared and for sale. His residence is in St. Paul's-Lane, two doors above the Post Office. March 13. d6t
