This Machine will wash at least 8 shirts quicker than a woman can one, and will save one-third of the Soap; and no one can imagine that it can wear the clothes half as much as rubbing by hand. It is managed very easily by one person, and will wash any kind of clothes, from the largest coverlet, to the smallest articles. None are requested to buy until they have proved the Machine to be equal to the description. The patent was obtained from government, on the 25th of April 1807.
