AIKIN'S GEOGRAPHY.

JUST PUBLISHED, And for sale by M. & J. CONRAD & CO. (Price Two Dollars) Geographical Delineations; Or, A Compendious View of the Natural and Political State of ALL PARTS OF THE WORLD. By J. AIKIN, M. D. Author of many valuable Works.

The precise object aimed at in this work, (says Dr. Aikin,) is to afford, in a moderate compass, and under an agreeable form, such a view of every thing most important relative to the natural and political state of the world, as may dwell upon the mind in vivid colors, and durably impress it with just and instructive notions.

No particular class or age of readers has been in view in this performance. If it prove answerable to my intentions, young persons of both sexes, at the period of finishing their education, may peruse it with advantage, as a summary of what is most important to be remembered relative to the topics treated of; and it may afford compendious information to those of maturer years, who are destitute of time and opportunity for copious research.

Tho' we possess many geographical works, yet it is presumed that the publication of Aikin's Geographical Delineations needs no apology. Many competent judges in Philadelphia, New-York and Boston, have examined this work, and unanimously agree that it is neat, perspicuous and useful; well adapted to the instruction of youth, and the information of persons of mature age. Perhaps it is no exaggerated praise of this work to assert, that no system of geography of equal size is, in all respects, so fit for the purposes of instruction and general reading.

Extract from the Annual Review, vol. 4. "The happy application of clear and precise description, judicious selection, and graceful plainness of style, to the illustration of geography, has already been felt and approved by the public, in Dr. Aikin's England Delineated. Nor will these Geographical Delineations, which at present demand our attention, be found in any respect unworthy of their author. Differing materially as to its object, both from the elementary treatises, and the more complete systems of this important and interesting branch of general science, this work may be considered as occupying a newly discovered station, whence young persons of both sexes may review with pleasure and advantage the real extent & bearings of their former studies.

"The principal materials of this work are necessarily compiled from other books; but a very pleasing part of it, the delineation of national characters, is original; and the strong tincture of liberal moderation diffused through the whole, together with the uniform good taste and simplicity of the style, give to it a certain charm that is easier felt than described."

For Sale or Rent,

The HOUSE at present occupied by Isaac Webster, esq. No. 1, King George-street, and next adjoining to that occupied by Mr. John M'Fadon. For terms apply to
