

To the Members of the Library Company of Baltimore.

It is now eleven years since the commencement of the Library Company of Baltimore; in the short period of time, a taste for useful reading, and polite literature, has evidently spread among the young of both sexes. A progression so pleasing in its nature, and beneficial in its effects, which this institution has certainly accelerated, cannot fail of securing to it, a continuance of protection and patronage.

A Library, formed with a due respect to Religion, and morals, which does not exclude works of genius, and amusement, which contains the most esteemed writings of every country, and the best books on the different arts, and in every branch of science and literature to whose ample stores, all persons may have access at a trifling expence, must rank amongst the most useful, and laudable institutions in society.

To select a Library, in conformity with these principles, calls for the Union of different talents, and various information. It must however be recollected, that although with a limited annual sum, all valuable books cannot at once be introduced, yet, that in time and successively, all of the greatest value, or importance, which can be procured, may find admission.

With such prospects, the Library company of Baltimore, was instituted, and under the influence of corresponding principles, it has been uniformly and steadily conducted down to the present hour. Believing it to be the wish of the members, to continue to society the advantages of the institution, will it not be considered indispensable.

1. That the directors should not be obliged to apply any part of the monies now annually expended in the purchase of Books to any other object.

2. That the means be provided competent to procure a lot of ground, in a suitable situation on which may be erected, when it shall become necessary, a commodious building, for the deposit of the Books of the Company?

With respect to the first, The Directors would lament the occurrence of any circumstance, that should abridge the annual supply of Books, or the increase of the Library, upon this point, they fell assured they concur in opinion with the great body of Stockholders.

With respect to the second point, they also flatter themselves with a concurrence, for although fixed in their determination to retain the room now possessed by the company, as long (if permitted by its proprietors) as it will serve to contain their books, yet, as the time must come when it will be inadequate to that purpose, the directors consider it prudent and advisable, that the company should be provided against such an event.

A Lot of Ground, in a suitable situation, may be now had on reasonable terms. Should the purchase be deferred, who will insure to the company, that we shall be able to get a suitable lot hereafter? The probability is, if we neglect to buy now, that we either cannot be accommodated at market when we cannot longer do without a lot, or must pay, for a convenient situation, an extravagant price.

Acting under these considerations, the directors recently proposed to the company an additional contribution of two dollars per annum, to be paid on each share, for 8 successive years. This proposed contribution, so easy and equal in its operation, which to each member would have amounted to sixteen dollars only, was unanimously agreed to, at a meeting of the company, convened on the 26th May last, but at a subsequent meeting (the concurrence of two being required for its confirmation) from some members misconceiving the object of the measure, & the necessity of making the purchase, at this time, not being felt, or but slightly felt by others, it was rejected by a majority of the few who attended on that occasion.

The necessity of adopting the measure, still pressing upon the directors with undiminished force, they conceive it to be their duty, to call the attention of the company again to the subject, more especially as they cannot permit themselves to entertain a doubt that a revision by men, friendly to the extension of the arts and literature among us, will lead to a favorable result. The following proceedings were accordingly had, at a meeting of their body, held the 1st July instant:

Resolved, That a general meeting of the members of the Library Company be, and hereby is requested, at the Library room, on the 17th of July inst. at 11 o'clock, A. M. in order to determine on the following proposition, which, if then agreed to and confirmed by the company at a future meeting, will become of constitutional force:

1. That every member of the Library Company of Baltimore shall pay annually, in addition to his present annual contribution, the sum of two dollars for eight successive years, which payments may be enforced under the regulations and in the mode prescribed for compelling payments of the said stated annual contributions: provided always, that any member shall be at liberty to advance fourteen dollars in one payment at any time on or before the first annual contribution becoming due, which advance shall be received in lieu of his eight years additional contributions.

2. That the directors of the Library Company of Baltimore, be and are hereby authorized and required to appropriate the said additional contributions or so much thereof as may be necessary to the purchase of a suitable lot of ground, on which may be erected a commodious building for the deposit of the books of the Library when the funds will permit.

To Lease, on ground-rent,

SIX LOTS on Franklin-street, south side, opposite to the water company's reservoir; 20 feet front & 50 feet deep; beginning for No. 1 at the distance of about 304 feet from the intersection of Franklin and Calvert-streets, and running eastwardly for breadth adjoining each other, and bounding on Franklin-street.
Also, six other LOTS on Gravel-alley, the north side, 20 feet front and 50 feet deep. Gravel-alley runs parallel with Franklin-street, and is 20 feet wide. The Lots on it run back to those on Franklin-street. Persons who take Lots on Franklin-street, will therefore have an opportunity of making them 140 feet deep, to run back to the alley.
Persons who wish to take lots of this depth, may, if they choose, have a greater front. Those who prefer purchasing in lots simple, may have a credit of 12 months, on approved notes with endorsers, and a clear title when the money is paid.
A plat may be seen, and terms known, by application to the subscriber, or to James Baker, surveyor, Oldtown, near the foot-bridge, who will show the lots.

HAS opened his SLATE YARD, on Spear's wharf, below Smith & Hooper's Bake-house, for the sale of SLATE, of which he has a good supply in readiness for the present season. The quality of the Slate is such that little need be said of it—general satisfaction has been experienced by those who have used it.
Many buildings in this city are covered with Slate that is really rotting, owing to the quantity of clay naturally mixed with it; but the slate here advertised is of the most durable kind, in consequence of the Iron contained in it. Such persons as see it their interest to use an article of acknowledged superiority, may depend on having their orders punctually executed, as W. C. is determined to receive no more than he can fulfil in time agreeably to contract.
The buildings already covered with this slate are as follow:—Mr. Robert Oliver's bank buildings in Gay street; captain Carr's, on Fell's Point; Philip Littig's, Baltimore-street; Henry Payson's, Hanover-street; Jacob Myers's, South-street, and Amos A. Williams's warehouse, on Bowly's wharf.
N. B. The price of the Slate is 10 Dollars per square of ten feet (100 feet superficial measure.) The slate is measured when the work is finished, allowing one foot extra in the length of the eaves, hips and valleys.
SLATERS will be recommended, if required, that will do credit to the work.

Proposals by

CONRAD, LUCAS & CO. (late M. & J. Conrad & Co.) No. 138, Market street,
For Publishing
LEWIS & CLARK'S TOUR TO THE
PACIFIC OCEAN

THROUGH THE INTERIOR OF THE CONTINENT OF NORTH AMERICA. Performed by order of the Government of the United States, during the years 1804, 1805 and 1806.

THIS work will be prepared by captain Meriwether Lewis, and will be divided into two parts, the whole comprized in three volumes octavo, the first containing at least 700 pages, the second and third from four to five hundred each, printed on good paper, and a fair Pica type. The several volumes in succession will be put to press at as early periods as the avocations of the author will permit him to prepare them for publication.
Part the first in two volumes.
Volume first.

WILL contain a narrative of the voyage, with a description of some of the most remarkable places in those hitherto unknown wilds of America, accompanied by a map of good size, a large chart of the entrance of the Columbia river, embracing the adjacent country, coast and harbors, and embellished with views of two beautiful cataracts of the Missouri; the plan, on a large scale, of the connected falls of that river, as also of those of the falls, narrows and great rapids of the Columbia, with their several portages. For the information of future voyagers, there will be added in the sequel of this volume, some observations and remarks on the navigation of the Missouri and Columbia Rivers, pointing out the precautions which must necessarily be taken, in order to ensure success, together with an itinerary of the most direct and practicable route across the continent of North America, from the confluence of the Missouri and Mississippi rivers to the discharge of the Columbia into the Pacific Ocean.
Volume second.

Whatever properly appertains to geography, embracing a description of the rivers, mountains, climate, soil and face of the country, a view of the Indian nations distributed over that vast region, showing their traditions, habits manners, customs, national characters, stature, complexions, dress, dwellings, arms, and domestic utensils, with many other interesting particulars in relation to them; also observations and reflections on the subjects of civilizing, governing and maintaining a friendly intercourse with those nations. A view of the fur trade of North America, setting forth a plan for its extension, and showing the immense advantages which would accrue to the mercantile interests of the United States, by combining the same with a direct trade to the East-Indies through the continent of North America. This volume will be embellished with twenty plates illustrative of the dress and general appearance of such Indian nations as differ materially from each other; of their habits; of their weapons and armaments used in war; their hunting and fishing apparatus; domestic utensils, &c. In an appendix there will also be given a diary of the weather kept with great attention throughout the whole of the voyage, showing also the daily rise and fall of the principal water-courses which were navigated in the course of the same.
Part the second: in one volume.

This part of the work will be confined exclusively to scientific research, and principally to the natural history of those hitherto unknown regions. It will contain a full dissertation on such subjects as may have fallen within the notice of the author, and which may properly be distributed under the heads of Botany, Mineralogy, and Zoology, together with some structures on the origin of Præterites, the cause of the mudiness of the Missouri, of volcanic appearances, and other natural phenomena which were met with in the course of this interesting tour. This volume will also contain a comparative view of twenty three vocabularies of distinct Indian languages, procured by captains Lewis and Clark, on the voyage, and will be ornamented and embellished with a much greater number of plates than will be bestowed in the first part of the work, as it is intended that every subject of natural history which is entirely new, and of which there are a considerable number, shall be accompanied by an appropriate engraving illustrative of it.
This distribution of the work has been made with a view to the accommodation of every description of readers, and is here offered to the patronage of the public in such a price, that all persons wishing to become subscribers, may accommodate themselves with either of the parts, or the entire work, as it shall be most convenient to themselves.
Detached from this work, there will be published
LEWIS AND CLARK'S
Map of North America.

From Long 9 deg. west, to the Pacific Ocean, and between 36 deg. and 52 deg. N. Lat. with extensive marginal Notes; Dimensions Five feet eight inches by Three feet nine inches.
Embracing all their late discoveries, and that part of the continent heretofore the least known. This Map will be compiled from the best maps now extant, as well published as in manuscript, from the collective information of the best informed travellers through the various portions of that region, and corrected by a series of several hundred celestial observations, made by captain Lewis during his late tour.
For the convenience of subscribers, these several works will be delivered at the most respectable commercial towns, and at the seats of government of the respective states and territories within the Union: no advance is required, nor will payment be demanded until such delivery is made.
The price of part the first, in two vols. will be ten dollars, and that of part the 2d in one volume, eleven dollars, delivered in boards. Price of the Map, 10 dollars.
Any persons who may have subscribed for stipulated prices for the same, and who may be dissatisfied with the terms now proposed, are at liberty to withdraw their names from such lists, at any time prior to the 1st of December next.
