Seven Dollars per Annum.

TUESDAY, AUGUST 18, 1867.

[Vol. XXVII—No. 4136.]

## Sale by Auction.

The subscriber will offer for sale on the premises on THURSDAY, the 23rd instant, if fair, if not the next fair day, at 10 o'clock, a HOUSE & LOT on the Frederick-town turnpike-road, about five miles from Baltimore. The house is a frame, two stories high, with a kitchen and garden, and would suit for a Tavern. The Lot contains about five acres; is enclosed with a good fence (part stone and part post and rails) has a number of good springs, and would answer well for the establishment of a tanyard.

The terms of sale. One half cash, the other half to be paid in six months.

ABRAHAM ENGEL, d4t

## Sale by Auction.

ON TUESDAY, The 1st September, at 4 o'clock in the afternoon, will positively be sold, on the premises, on terms that will be made known, at time of sale, a three story Brick Dwelling HOUSE, on Market-space, No. 25, near the Fish-Market, with a two story Brick Kitchen. The above property is well calculated for a Tavern, Boarding House, or Retail Store.

## PROPOSALS,

By EZRA SARGEANT, No. 39, Wall-street, New-York,  
For publishing by subscription,  
A NEW CYCLOPEDIA,  
OR,  
Dictionary of Arts & Sciences.

BY G. GREGORY, D. D.  
Author of Essays Historical and Moral, the Economy of Nature, &c. &c.

To be completed in twelve months from the time it is put to press. In Twelve Parts. Price two dollars and seventy-five cents each.

Its literary Quackery which prompts the publisher of every new work to endeavor to magnify the merits of his own intended publication by depreciating the merit of all other similar productions, is, at once, both useless and despicable; because nothing human can rise into esteem and honor, merely upon the ruins of another's reputation, without some intrinsic excellence of its own.

The Publisher of Gregory's Cyclopaedia, and declare, that the generality of Books called Encyclopaedias are, in their very constitution and form, too expensive and too cumbersome, to be either extensively circulated, or generally useful; and will content himself with briefly stating the claims and pretensions of the Book which he hereby proposes to offer to the public.

First. It comprises the most valuable information in all the important departments of Knowledge, collected and arranged by some of the best scholars, and the most comprehensively scientific men, this day existing in Britain.

Secondly. This information is comprised in a small compass, and conveyed in language at once perspicuous and elegant; so that the reader may, in a short space of time, with ease and pleasure to himself, obtain that real acquaintance with the moral, literary, political, and philosophical world, which other works could not be acquired from the larger works in which the sources of these streams of knowledge are contained, but by a whole life devoted to severe and unremitted labour.

In order to render the work worthy of the patronage of the American public, the Publisher has engaged all the best American Artists to engrave the Copper-Plates, of which 138 will be given in the course of the work; and has also secured the assistance of Editors of acknowledged talents and information.

It is with the blended emotions of confidence and delight, that the Publisher announces his intention of offering to his numerous patrons and supporters, a work which combines elegance with economy, and practical utility with splendor.

That the Patrons and Subscribers of this intended Publication, may be thoroughly assured of not having their patronage and protection abused by any defect in the execution of the work itself, or any want of punctuality in its appearance, at the stated and appointed times, the page given as a specimen of the style in which the publisher solemnly pledges himself the whole shall be executed, may be seen at the office of the Federal Gazette.

On account of the great abundance of matter and the number of Engravings which the work will contain, and in consequence of the vast expense necessarily attending the completion of such a plan, the publisher is compelled to solicit the aid of a sufficient number of subscribers, to enable him to carry his purpose into full effect, before he puts any part of the intended Publication into the hands of the Engraver or the Printer.

The acknowledged and intrinsic merits of the work are such as to ensure it a very general and extensive circulation; wherever it only remains to the Publisher to ensure to his subscribers that the whole of the execution, as to the accuracy and elegance of the engravings, paper, and type, shall be such, as in every respect to correspond with the high value of the work. As to the engravings, as yet no specimen can be given; but the Publisher pledges himself that they shall be at least equal, and many superior to those in the London edition.

That there may be no possibility of disappointment to the patrons of literature as to this work, the subscriptions are proposed to be received on the following

CONDITIONS:  
1st. The whole shall be comprised in Twelve parts, one of which shall be published monthly. Each part shall contain about 150 quarto pages, neatly done up in colored paper, at the price of Two Dollars and Seventy-five Cents, which is to be paid for on the delivery of each part—The whole twelve parts when complete will make two volumes in quarto, containing 238 Copper-Plate Engravings, which alone are worth the price of the whole work. It will contain more than double the matter of any similar work that has ever been published in this country.

2dly. One Dollar shall be paid at the time of subscribing, and to be deducted on the delivery of the twelfth part.

3dly. If the work be not executed in every respect equal to the engagement hereby made the subscribers shall, on returning the volumes, receive back the amount of their subscription money which has been advanced.

If required, the publisher will give a Certificate, pledging himself to that effect, to each subscriber, at the time of subscribing.

The price of each part will be raised to Three Dollars, the moment that the whole is put to press; and even then, the whole expense of a work which contains the substance of all that is known on every subject, literary and scientific, will be only 36 Dollars.

Subscription received by GEORGE HILL, No. 104, Baltimore-street, New-York, May, 1867. June 1. d

From the above Scheme, it appears that there are less than two Blanks to a Prize; and that the Prizes are to be paid without deduction. The advantages offered to adventurers, and the very charitable object to which the money is to be applied, induce the Managers to hope, that a speedy sale of the tickets will enable them to commence drawing at an early day. All prizes will be paid in sixty days after the completion of the drawing, and such prizes as are not demanded within twelve months, will be considered as generous donations to the truly charitable object of the Lottery.

Tickets may be had of the Managers, and such other persons as they may appoint to sell. Prizes in the Lotteries now drawing in this city, will be received in payment for tickets.

The prevailing disposition to encourage the progress of Literature—the peculiar favor which St. Mary's College has enjoyed—and the many splendid chances offered to adventurers by the above scheme, induce the managers to anticipate a rapid sale of the tickets. The drawing will commence as soon as a sufficient number is sold to authorize it. The managers have given bond to the state in the penalty of sixty thousand dollars, for the faithful payment of the prizes, which will be paid subject to a deduction of 15 per cent. 30 day, after the drawing is finished. Prizes not demanded within a twelve-month from the completion of the drawing, will be considered as a donation to the College.

## Proposals by

CONRAD, LUCAS & CO. (late M. & J. Conrad & Co.) No. 138, Market street, For Publishing  
LEWIS & CLARK'S TOUR TO THE PACIFIC OCEAN THROUGH THE INTERIOR OF THE CONTINENT OF NORTH AMERICA. Performed by order of the Government of the United States, during the years 1804, 1805 and 1806.

THIS work will be prepared by captain Meriwether Lewis, and will be divided into two parts, the whole comprized in three volumes octavo, the first containing at least 700 pages, the second and third from four to five hundred each, printed on good paper, and a fair Fica Type. The several volumes in succession will be put to press at as early periods as the avocations of the author will permit him to prepare them for publication.

Part the first: in two volumes. Volume first.

WILL contain a narrative of the voyage, with a description of some of the most remarkable places in those hitherto unknown wilds of America, accompanied by a map of good size, a large chart of the entrance of the Columbia river, embracing the adjacent country, coast and harbors, and embellished with views of two beautiful cataracts of the Missouri; the plan, on a large scale, of the connected falls of that river, as also of those of the falls, narrows and great rapids of the Columbia, with their several portages. For the information of future voyagers, there will be added in the sequel of this volume, some observations and remarks on the navigation of the Missouri and Columbia rivers, pointing out the precautions which must necessarily be taken, in order to ensure success, together with an itinerary of the most direct and practicable route across the continent of North America, from the confluence of the Missouri and Mississippi rivers to the discharge of the Columbia into the Pacific Ocean.

Volume Second.

Whatever properly appertains to geography, embracing a description of the rivers, mountains, climate, soil and face of the country; a view of the Indian nations distributed over that vast region, showing their traditions, habits, manners, customs, national characters, status, complexions, dress, dwellings, arms, and domestic utensils, with many other interesting particulars in relation to them; also observations and reflections on the subjects of civilization, governing and mining a friendly intercourse with those nations. A view of the fur trade of North America, setting forth a plan for its extension, and showing the immense advantages which would accrue to the mercantile interests of the United States, by combining the same with a direct trade to the East-Indies through the continent of North America. This volume will be embellished with twenty plates illustrative of the dress and general appearance of such Indian nations as differ materially from each other; of their habitations; their weapons and habiliments used in war; their hunting and fishing apparatus; domestic utensils, &c. In an appendix there will also be given a diary of the weather kept with great attention throughout the whole of the voyage, showing also the daily rise and fall of the principal water courses which were navigated in the course of the same.

Part the second: in one volume.

This part of the work will be confined exclusively to scientific research, and principally to the natural history of those hitherto unknown regions. It will contain a full dissertation on such subjects as may have fallen within the notice of the author, and which may properly be distributed under the heads of Botany, Mineralogy, and Zoology, together with some strictures on the origin of Prairies, the cause of the muddiness of the Missouri, of volcanic appearances, and other natural phenomena which were met with in the course of this interesting tour. This volume will also contain a comparative view of twenty-three vocabularies of distinct Indian languages, procured by captains Lewis and Clark, on the voyage, and will be ornamented and embellished with a much greater number of plates than will be bestowed in the first part of the work as it is intended that every subject of natural history which is entirely new, and of which there are a considerable number, shall be accompanied by an appropriate engraving illustrative of it.

This distribution of the work has been made with a view to the accommodation of every description of readers, and is here offered to the patronage of the public in such shape, that all persons wishing to become subscribers, may accommodate themselves with either of the parts, or the entire work, as it shall be most convenient to themselves.

Detached from this work, there will be published LEWIS AND CLARK'S

## Map of North America,

From Long 9 deg. west, to the Pacific Ocean, and between 36 deg. and 52 deg. N. Lat. with extensive marginal Notes; Dimensions Five feet eight inches by Three feet ten inches.

Embracing all their late discoveries, and that part of the continent heretofore the least known. This Map will be compiled from the best maps now extant, as well published as in manuscript, from the collective information of the best informed travellers through the various portions of that region, and corrected by a series of several hundred celestial observations, made by captain Lewis during his late tour.

For the convenience of subscribers, these several works will be delivered at the most respectable commercial towns, and at the seats of government of the respective states and territories within the Union; no advance is required, nor will payment be demanded until such delivery is made.

The price of part the first, in two vols. will be ten dollars, and that of part the 2d in one volume, eleven dollars, delivered in boards. Price of the Map, 10 dollars.

Any persons who may have subscribed for these works, to lists which contain no stipulated prices for the same, and who may be dissatisfied with the terms now proposed, are at liberty to withdraw their names from such lists, at any time prior to the 1st day of December next.
