Just Received

From Philadelphia, and for sale by GEORGE HILL, The most valuable work that has been presented to the public these ten years. AN INQUIRY INTO THE NATURE AND EFFECTS OF

The Paper Credit

OF GREAT-BRITAIN. By H. THORNTON, ESQUIRE, Member of Parliament.

The subjects discussed in the above work are of a nature so extremely interesting to every person at all concerned in Commercial Transactions or Bank Institutions, and correct information respecting them so difficult to be obtained, that it cannot fail being read with profit and pleasure.

The following short prospectus of its important subjects will give some idea of the nature of it, viz. Commercial credit; paper credit, as arising out of it; commercial capital; trade by barter; money; bills of exchange and notes; bills and notes considered as discountable articles; fictitious bills or bills of accommodation; circulating paper; bank notes; the nature of the bank of England; the reason for never greatly diminishing its notes; the balance of trade; the course of exchange; error of imagining that gold can be provided at the time of actual distress; country banks, their advantages and disadvantages; the tendency of a too great issue of bank paper to produce an excess of the market price above the mint price of gold; the means by which it creates this excess; the circumstances which render it necessary that the bank should impose its own limit on the quantity of its paper; effect of the law against usury; proof of the necessity of restricting bank loans, drawn from the case of the transfer of capital to foreign countries; of the influence of paper credit on the price of commodities.

The following extract from the Edinburgh Review respecting the above work will show the estimation in which it is held in Europe Speaking of the suspension of cash payments at the bank of England, it proceeds to observe, "Of all the publications which that momentous event has occasioned, the most valuable, unquestionably, is this of Mr. Thornton. With no ostentatious professions, and with no admixture of superfluous matter, it contains the largest portion of new information, that has for a long time been offered to those who either for the pleasure of speculation, or with a view of public life, are engaged in the researches of political economy."

Containing a few Books and some Women's Apparel, was lost last night from the Philadelphia road, within three miles from Baltimore. Grateful thanks, or a suitable reward will be given for returning said Trunk at Mr. Fager's South Gay-street, No. 4. August 30. d4t

PROPOSALS,

By EZRA SARGEANT, No. 39, Wall-street, New-York. For publishing by subscription, A NEW CYCLOPEDIA, OR,

Dictionary of Arts & Sciences. BY G. GREGORY, D. D. Author of Essays Historical and Moral, the Economy of Nature, &c. &c. To be completed in twelve months from the time it is put to press. In Twelve Parts. Price two dollars and seventy-five cents each.

The literary Quackery which prompts the publisher of every new work to endeavor to magnify the merits of his own intended publication by depreciating the merit of all other similar productions, is, at once, both useless and despicable; because nothing human can rise into esteem and honor, merely upon the ruins of another's reputation, without some intrinsic excellence of its own. The Publisher of Gregory's Cyclopaedia, therefore, will leave it to others to discover and declare, that the generality of Books called Encyclopaedias, in their very constitution and form, too expensive and too cumbersome, to be either extensively circulated, or generally useful; and will content himself with briefly stating the claims and pretensions of the Book which he hereby proposes to offer to the public.

First. It comprises the most valuable information in all the important departments of Knowledge, collected and arranged by some of the best scholars, and the most comprehensively scientific men, this day existing in Britain Secondly. This information is comprised in a small compass, and conveyed in language at once perspicuous and elegant; so that the reader may, in a short space of time, with ease and pleasure to himself, obtain that real acquaintance with the moral, literary, political, and philosophical world, which otherwise could not be acquired from the larger works in which the sources of these streams of knowledge are contained, but by a whole life devoted to severe and unremitting labour.

In order to render the work worthy of the patronage of the American public, the Publisher has engaged all the best American Artists to engrave the Copper Plates, of which 138 will be given in the course of the work; and has also secured the assistance of Editors of acknowledged talents and information.

It is with the blended emotions of confidence and delight, that the Publisher announces his intention of offering to his numerous patrons and supporters, a work which combines eloquence with economy, and practical utility with splendor.

That the Patrons and Subscribers of this intended Publication, may be thoroughly assured of not having their patronage and protection abused by any defect in the execution of the work itself, or any want of punctuality in its appearance, at the stated and appointed times, the page given as a specimen of the style in which the publisher solemnly pledges himself the whole shall be executed, may be seen at the office of the Federal Gazette.

On account of the great abundance of matter and the number of Engravings which the work will contain, and in consequence of the vast expense necessarily attending the prosecution of such a plan, the publisher is compelled to solicit the aid of a sufficient number of subscribers, to enable him to carry his purpose into full effect, before he puts any part of the intended Publication into the hands of the Engraver or the Printer.

The acknowledged and intrinsic merits of the work are such as to ensure it a very general and extensive circulation; wherefore it only remains to the Publisher to assure to his subscribers that the whole of the execution, as to the accuracy and elegance of the engraving, paper, and type, shall be such, as in every respect to correspond with the high value of the work. As to the engravings, as yet no specimen can be given; but the Publisher pledges himself that they shall be at least equal, and many superior to those in the London edition.

That there may be no possibility of disappointment to the patrons of literature as to this work, the subscriptions are proposed to be received on the following CONDITIONS:

1st. The whole shall be comprised in Twelve parts, one of which shall be published monthly. Each part shall contain about 150 quarto pages, neatly done up in colored paper, at the price of Two Dollars and Seventy-five Cents, which is to be paid for on the delivery of each part—the whole twelve parts when completed will make two volumes in quarto, containing 238 Copper-Plate Engravings, which alone are worth the price of the whole work. It will contain more than double the matter of any similar work that has ever been published in this country.

2dly. One Dollar shall be paid at the time of subscribing, and to be deducted on the delivery of the twelfth part.

3dly. If the work be not executed in every respect equal to the engagement hereby made the subscribers shall, on returning the volumes, receive back the amount of their subscription money which has been advanced. If required, the publisher will give a Certificate, pledging himself to that effect, to each subscriber, at the time of subscribing.

4thly. The price of each part will be raised to Three Dollars, the moment that the work is put to press; and even then, the whole expense of a work which contains the substance of all that is known on every subject, literary and scientific, will be only 36 Dollars.

Subscription received by GEORGE HILL, No. 104, Baltimore-street. New-York, May, 1867. June 1. d
