

~~a~~ day or two, after which time he did his duty the same as the rest. His eyes were weak during the remainder of his service. His eyes ~~got~~ soon got over being blood shot, but his eyes were occasionally watery until we were discharged. He did not complain of his eyes flaming him after the first few days, but he said that at times his sight was affected. I did not notice that his face was burned by the powder. After a day or two the injury to his eyes did not prevent him doing his duty. I saw Soldier quite frequently after his discharge and he always said that he could not see as well as he did before his eyes were injured as above stated. His eyes always looked smaller and weak after said injury. I think I made a statement in this ~~case~~ ^{case} while I was in Baltimore. Isaac Dacey was with me. I cannot read and write. I have heard you read said affidavit, I wish to make some corrections to it. I do not recollect of his going to the hospital. I think the Surgeon's name was Tucker instead of O'Neil. When he complained of pain and was unable to see objects ^{it} was immediately after his eyes were injured. I never heard him complain of pain in his eyes since discharge, but I have heard him say that he could not see as well as before his eyes were injured. I understand the questions & can correctly recollect my name is Joshua not Jacob.
