

Complained of his leg or either one of them
After he came back from hospital. The
Complaint of his right arm and shoulder
all the time after this unit discharged.
I don't remember of his being away from
the Company on detail with the sharpshooters
after this or at any time in the service. I
do not know and never heard of his being
wounded or injured in any manner at any
other time in the service and do not know
of his being sick, treated by the Surgeon or
in the hospital at any time save as
I have told you, or that he was excused
from duty for any reason save that of
the Complaint of his right arm and
shoulder. I think it was Dr. Perry who
excused him from duty, but it might have
been Dr. Morris. I do not know where
either one of these doctors are now. I saw
the shoulder soon after he came from hospital.
There was a scar about two inches long at
the top and a little in front of the shoulder.
It was healed up at the time. I never
saw the shoulder before the charge at Fort Gilmore
and never heard him complain of it until
after he came from the hospital. I have
not seen the claimant since the war
until the last year or so, but during
that time he has complained of his right
arm and shoulder. I cannot give any
name. I made an affidavit in this
claim. I am not related to the
claimant or interested in the
success of his claim for pension.
I am not receiving pension and
never filed a claim. I think I
have stated all I know about this
man in the service or since discharge.
I fully understand and comprehend
