

He was complaining when I first saw him after the war, but what he complained of, or what the disability was I can't remember. I do not know now what ails him, but he seems still "broke up."

I could not say if he had Rheumatism, Jaundice or Kidney Disease or any other trouble.

He has not worked much for years, don't think he has been over 5. I do not think I was a witness for Taylor, but I have been a witness for a great many.

Yes I lived in the same house with the claimant, but I can't tell the date. I do not know that it was 1869. He was sick the year after I left. Can't say what ailed him. No, I can't swear that it was Rheum.

(Off. read)

No, I did not know that he suffered with a Hernia, I can't remember those things so far back. And I can't read or write.

Witness David Foster  
 W. O. Lovell

Deponent.

Sworn to and subscribed before me this 22 day of July 1896, and I certify that the contents were fully made known to deponent before signing.

D. H. Harrison  
 Special Examiner.
