

State of _____ County, ss.:

In the matter of the Pension Claim No. _____ of _____

Co. _____ Regt. _____ Vols.:

On the 25th day of October 1889, before the undersigned authority within and for said County and State, personally appeared Dr. F. B. Gardner who being duly sworn, states on oath that he first became acquainted with the physical condition of the said James Henshaw after his return from the army about 1869, and found him suffering from disease called

Abcess of the Groin

from which he knew him to continue to suffer each year up to about 1884

That he has treated him for said disease at intervals from about _____

_____ 1869, to about _____ 1889 That it is believed the above originated in the U. S. Service.

The progress and symptoms of this disease have been as follows:

Weakness in the privates - Inability to pass water - Pain - Abcess forming on - sometimes one side sometimes the other - coming to head - and lanced - afterward treated as an ulcer - Situated in the Groin -

These sores appeared from time to time during the period above recurred.

Dr. F. B. Gardner
I have attended Jas. Henshaw since 1883
for paralysis due in part to his weakened
condition from the above mentioned
troubles. He has never fully recovered from
this attack, & has been totally incapacitated
for work of any kind.
