

Claimant in about ten minutes after and saw where he was wounded. it was on the right leg near the knee but I cannot recollect whether it was above or below the knee. It was bleeding at the time - Claimant had it bound up w Cold water. I cannot recollect the date when he was wounded. but we were on our way to Norfolk to get transportation home - probably a month before we were discharged.

Since I was discharged from the service I have <sup>lived</sup> in this City. and I suppose I have seen Claimant twenty or thirty times each year and know that he has constantly complained of the wound in his leg. said it pained him. and I know that he always limps on that leg. I cannot say <sup>how</sup> much the leg disables him. Claimant told me the trouble in his eye before he went into the Army. that it is something like a Cataract.

I know of no other disability with which Claimant has been afflicted.

I have previously testified in the Claimant's Affidavit made to and acknowledged. And the dates given as to time when Claimant was wounded is correct. They were then first in my mind.

I am not related or interested.
