

I do not know how old my husband was when he died, but he was more than 40 years - he must have been 60 or 70 years old. He had a paralytic stroke and could not move or speak for a week, then he got up and was almost entirely well as the man. I know. After we were married he would talk about things that he said happened 40 years ago.

He was well and about a month before he died - he had been all the time before that. He died at the Bay View Sanitarium and was buried out here on the farm. My husband had three brothers and two sisters that I know. Two brothers are dead and one is living in California. Their names are Martha Blackstone and Leathorne Miller. I cannot tell when they live.

Robert Blackstone is a great doctor - I do not know what the nature of the other one does for a living. I have no proof of any kind and no income from any source. I have mentioned your question and my answer has been correct. I hope in Rose.

Butterworth

He was not a doctor before in the 16 day of Feb. 1898, and I am sure that the contents were fully made known to the person before signing.
