

5th A

I do not know how all my husband was
 when he died, but he was more than 40
 years - he must have been 60 or 70 years
 old. He had a paralytic stroke and
 could not move or speak for a week,
 then he got up and was almost unable
 then he had another stroke and died. He
 was an old man. I know when we were
 married he would talk about things that
 he said happened 40 years ago.

He was well, only about a month before
 he died - he had been all the time before
 that. He died at the Bay View Sanitarium
 and was buried out here on Sharp St.
 My husband had three brothers and two
 sisters that I know. Two brothers are dead
 and one is crazy or idiotic. The two sisters
 are living in California. Their names
 are Martha Blackstone and Catherine
 Miller. I cannot tell when they live.
 Robert Blackstone is a great doctor - I
 do not know what the nature of his
 other one does for a living.
 I have no picture of any kind and no
 picture from my father.
 I have mentioned your question
 and my answer has been correct
 in the past.
