

There is a down of \$15 per year against the place at "The Rock"

and after Taxes, insurance, and down of the Harvins woman are deducted the net income from both places would not be over \$55 to \$60 - of which the claimant has $\frac{1}{3}$ only.

She has no other income or means of support than her down or $\frac{1}{3}$ interest in the income from the properties above referred to.

At the time of the soldier's death he was much deeper in debt than I had any idea of - and I know of about \$350⁰⁰ now due from his estate - and notes of his are constantly coming in - again she has borrowed about \$200, I know this because I borrowed the money for her and the hire, to meet some of his debts.

I have understood the questions asked me and my answers are correctly recorded.
