a real BARGAIN

WHEN big capacity for grinding feed can be had at a popular price as in this new Model "G" Case Hammer Mill, we think the news is worth shouting about. And so we invite, yes urge you to see what we believe is the biggest grinder bargain yet made available to feeders. You'll be astonished at its facilities for quick grinding of all grain and forage crops and with surprisingly little power.

The grinding method is the most efficient known. Twenty semi-rigid hammers reduce the material by impact in the air. All rotating parts on one shaft with two over-size ball-bearings. Lessens friction and insures long life. Remarkably simple. Only two places to oil. Unusually sturdy construction. Larger size with self feeder and two governors. Also power-contained mill for portable work. Any one of these mills permits new economies in feeding.
