KINGSTON TO RENT.
TO Rent for the ensuing year, and possession given on the first day of January next, that well known Farm called "Kingston" situated in King's Creek hundred, Talbot county, and immediately on the great Choptank River, together with the buildings, premises and appurtenances to the same belonging. Kingston has long since been established as a depot for grain and other articles intended for the Baltimore market and is considered one of the most eligible situations on the river for conducting boating business, and a Grocery Store, and has been successively used for the above purposes. An investment of a very moderate Capital, conducted with industry and enterprise, would no doubt yield a handsome profit. The situation is healthy, the soil productive and the buildings in tolerable repair and will be made completely so, in the early part of next spring. Terms made moderate to an approved tenant. Persons desirous of renting are invited to view the premises and apply to the subscriber.

PRIZE ESSAY.
THE MEDICAL AND CHIRURGICAL FACULTY OF MARYLAND, at their annual convention held in the city of Baltimore, on the 7th and 8th June, 1830, passed the following resolution, viz:
"Resolved, That a committee of seven be appointed to award a premium of one hundred dollars for such essay as they or a majority of them shall consider worthy thereof. The subject of such essay to be selected by said committee."
In conformity with the benevolent intentions of the Faculty expressed in the aforesaid resolution the committee offer a premium of \$100 for an essay upon the nature and sources of the Malaria or noxious Miasma, from which originate the family of diseases usually known by the denomination of bilious diseases; together with the best means of preventing the formation of Malaria, removing the sources, and obviating their effects upon the human constitution when the cause cannot be removed.
The committee have been induced to call the attention of the profession to this subject, because of its vast importance to society at large. The immense extent to which this fruitful cause of disease operates, has not yet been accurately calculated, nor any probable estimate made of the mortality which it occasions. The public attention has been justly directed to other subjects of general improvement, but we believe no adequate effort has yet been made to awaken and direct the public mind to the prevention of the evils dependent upon Malaria, although it is well known to medical men to be extending its influence, and threatening to depopulate some of the finest sections of this country, as it has already depopulated some of the fairest portions of the old world.
Candidates for the prize are to cause their dissertations to be delivered to the subscriber, in Baltimore, (postage paid,) on or before the first day of May 1831. Each dissertation to be accompanied by a sealed letter, superscribed with a motto corresponding with that prefixed to the essay. None of the letters, except that to which the motto of the successful essay shall be affixed, will be opened; the other essays shall be disposed of according to the direction of the proprietors.
HENRY W. BAXLEY,
Secretary to the Committee.
