THRASHING MACHINE.

WE, the subscribers, being present at an exhibition of L. Cooley's Patent Thrashing Machine and Portable Horse Power, in operation at Mr. Buckman's Farm, near Philadelphia, were very much surprised as well as delighted with its operation it being the production of native genius; and as a tribute of merit due to the Patentee, we offer to the public the following facts, viz: it thrashed in one minute seven large sized sheaves, measuring round the middle three feet ten inches, eight of which make one bushel when cleaned; and in seven minutes fifty sheaves, making at the rate of fifty four bushels the hour. The above machine is propelled by two horses, without mashing it, leaving the straw in good condition. We further state that we conceive this machine superior to any heretofore offered to the public, and recommend it to the agriculturist as a cheap, permanent labor saving machine, and more simple in its construction than any thing of the kind we have ever seen.
