

Deafness.

A remedy therefore is to be had of Dr. Green, Reading and Belvidere, State of Pennsylvania. It is to be taken inwardly. It is innocent, and cures by strengthening the nerves. As many many cases of deafness are cured by various means; consequently people of this class seem to get their hearing again.

For \$5 a sufficiency is sent for two persons per mail, free of postage, and is so sent on from time to time (if necessary) until a cure is performed, without any additional charge.

Further: The \$5 are merely considered as a friendly reward, for Dr's. time and mental labour that he devotes to his applicants.—and out of which the postage of all letters are also paid.

Persons can live as usual—can eat and drink what tastes best, moderately, consequently it will be more of a pleasure than a task to use the remedy.

No charge is made for the cure. No. When people get their hearing again—I can be paid with money.

Let such people offer up prayers to God, and not to the physician, for it is to him that praise is due, not to man.

The former giveth seed to the earth; but a kind Providence giveth harvest. So on similar principles, the Physician gives remedy to the sick, but the same kind Providence giveth health. Let us be thankful.

N.B. Editors who publish the above will be entitled to the R. remedy for their kindness as often their friends and neighbours may be in distress and want same.

MORNING COURIER & NEW YORK ENQUIRER.

THE Morning Courier and New York Enquirer, by JAMES WATSON WEAVER & Co. in the city of New York, daily and semi-weekly, on fine paper of the largest size. In its Politics it is purely Democratic, adhering to the principles and usages of the Republican Party, and advocating the re-election of General Jackson to the Presidency. Its columns are alike devoted to Foreign and Domestic Intelligence, Morals, Literature and the Fine Arts. In morals, however, it does not act upon the creed of Fanatics or Bigots, but on the contrary, inculcates those principles of morality and religion only, which are founded upon peace and good-will to all mankind—the fruit of which is tolerance and brotherly affection instead of "persecution for opinion's sake." All Bigots, Fanatics, Sunday-Mail Opponents, and Church-and-State-men, are opposed on principle, and their hypocrisy and machinations fearlessly exposed.

In consequence of the other Daily Papers in New York, determining not to board vessels and receive their news on Sunday, the Courier & Enquirer have lately increased nearly \$1,000 in a separate "News Establishment," the support of which will add about \$5,000 to their annual expenses. Vessels from Europe will be boarded at sea, long before they reach the harbor, and their news disseminated through the country with more than ordinary despatch. In incurring this heavy increase of expenditure, the Proprietors look for remuneration to all who feel an interest in the affairs of the Old World, and if they have properly estimated the popular feeling in relation to this matter, they will be efficiently sustained in the course they have adopted.

It does not become them to speak of the manner in which their Editorial Department is conducted—it may be stated, however, that Assistant Editors and Reporters are employed at liberal salaries; and if the Commercial, Political, Literary, Foreign and Domestic News, were not at least equal to any other Journal, it would scarcely have acquired in the short period of five years, a greater daily circulation than any other paper in America. Yet such is the fact, that at this moment the Courier and Enquirer circulates daily in the city of New York more than one hundred per cent. more papers than any of its contemporaries.

Daily papers sent out of the city, are not printed until 2 o'clock, P. M., when all the news received by the morning mails, or by Foreign arrivals, are inserted in a Second Edition—so that the Daily Subscribers in the country, literally receive a Morning and Evening Paper combined; and this being the only paper collecting news on Sunday, it follows of course that the news by all foreign arrivals on that day, will be found in the columns of the Courier and Enquirer only.

A Price-current and Review of the Market will be published weekly, and the Second Edition will always notice any change which may occur in the state of our market. What ever appears in the Daily Paper, will of course, also be published in the Semi-weekly.

TERMS.
\$10 per annum. Payable in Semi-weekly Paper 4 per annum. Advance.
N. B. All Post-Masters, who have no objection to act as our Agents, are requested to receive subscriptions and to remit the money at the risk of the Publishers, at the time of ordering the paper.—It is expected that they will retain in their hands 10 per cent. of the amount received, as a remuneration for their trouble.

DIOWELL'S REPORTER, Counterfeit Detector and PRICE CURRENT.

THE first year of the publication having been concluded, the "Reporter" will hereafter be published weekly, as well as semi-monthly. We feel gratified to the public for the liberal patronage awarded us, (having now a more extensive circulation than any other newspaper in the United States) and shall leave no measure untried, in order to render this journal valuable in all respects, not only to merchants, banking institutions, brokers, and holders of hotels, but to the community in general. We have engaged the literary assistance of several gentlemen well known as writers, and have correspondents in all the principal cities and towns in the United States. We also receive weekly more than five hundred newspapers from different parts of the Union, so that whatever information may be circulated through the medium of the "Reporter," and the resources from whence it is derived, we can confidently state, may, in all cases be relied upon as correct. Bank notes are being counterfeited in every direction, and on the arrival of every vessel from Europe, or the creation of every national excitement, the state of the market varies. Every person should therefore, be possessed of some certain guide by which all such information might be received by the earliest mails, and at such a rate as not to render its possession an exorbitant tax. Such a journal is exactly what we endeavour to render the "Reporter," in an effort to accomplish which, neither pains nor expense will at any time be spared on the part of the publisher. Every number will contain a carefully corrected Bank Note List, List of Broken Banks, Prices Current, Prices of Gold, Prices of Bank and insurance Stock and a description of all counterfeits and altered Notes in circulation throughout the United States, and all such information as is likely to throw light upon the subjects embraced in the design of this journal. The latest foreign news together with much original and well selected matter, will also be found in the columns of the "Reporter."

The terms of the weekly publication are \$3 per annum—the semi-monthly \$2—single copies 12 1/2 cents. Address.

TREASURY DEPARTMENT, October 12, 1831.

THE House of Representatives by a resolution of the 4th of May, 1830, directed the Secretary of the Treasury to collect and communicate to the House such information, and report his views on the same, as in his opinion, may be useful and important to Congress in enacting regulations for the navigation of steam boats or steam vessels, with a view to guard against the dangers arising from the bursting of their boilers.

Such measures were accordingly taken as were thought best calculated to obtain the requisite information. But, although some highly interesting and valuable communications have been received, the Department has not succeeded in collecting the facts sufficient to enable it to fulfill the directions of the House.

In consideration, therefore, of the difficulty of obtaining the requisite information, by any means within the power of the Department, and of the deep interest which the community, and more especially those engaged in steam navigation, have in the subject, it is thought best to make this public application to all who may be able, and are disposed, to promote the benevolent object of the Resolution.

Accidents, like those which it is the desire of the House to prevent, have, unfortunately, been so numerous that many persons will have it in their power to state the causes and circumstances of such casualties; and these, collected from various parts of the Union, cannot fail to be highly useful.

With a view to assist in giving that information, a precise and explicit character, the following queries were prepared.

It is not intended, however, to confine it to the points presented to them, or to the form of communication which they may seem to indicate. On the contrary, the Department will be happy to receive any information in such manner as the writer may be pleased to employ.

It is desirable that communications on this subject should be transmitted by the first of December, or early as may be thereafter.

LOUIS McLANE, Secretary of the Treasury.

INTERROGATORIES IN RELATION TO THE BURSTING OF STEAM BOILERS.

1. Are you acquainted with the nature and use of Steam Engines? In what employment have you been engaged? Were you present, and in what capacity, at the bursting of any steam boiler, or of a boiler, or of a flue, or have you been made acquainted, by other means, with the facts in any such case? If so, in what case?

2. In that case, was the water in the boiler above gauge cocks? If not, at what height, compared with the lower gauge cock?

3. If the boiler contained a flue, what was the difference between the height of its upper side and that of the lower gauge cock?

4. What was the weight per square inch on the safety valve?

5. Had the safety valve ever been found rusted or sticking in the aperture, or was it so at the time?

6. Had that part of the boiler above the water ever been heated to a red heat, or on proaching thereto?

7. Was there any incrustation or sediment found at the bottom of the boiler? If so, what was its thickness and composition?

8. In what part was the boiler rent, and what was the appearance and extent of the rent?

9. If the bursting happened to the boiler of a steam boat, was the boat under way, or at anchor? Was the valve open? If so, how long before the accident? Was it opened by the engineer, or by pressure?

10. Was the piston going at its usual speed, or faster, or slower?

11. Had the firemen found any unusual difficulty in keeping up the motion of the engine previously to the bursting of the boiler; and if so, how long before?

12. Do the iron boilers used in the western waters generally accumulate a calcareous incrustation at the bottom? If so, have any or what means been used, with success, to prevent it?

13. Is it observed that when there is a sediment or incrustation on the bottom of the boiler, it requires more fire than usual to raise the steam; and how often is the sediment removed, and by what means?

14. Are any means used for preventing incrustation on the bottom of boilers; and if so, what effect has been observed?

15. Have any means been employed to prove steam boilers before they are used or afterwards, and what pressure has usually been applied to iron of a given thickness? Are the proofs made when the iron is cold or hot?

16. Is there any instrument employed to ascertain the temperature of the boiler above the water, or of the steam in the upper part of the boiler? If so what is it?

17. What means are used to prevent the fire from the fire place and flue from extending to the boiler?
