A MUSKRAT dug a hole through the bank of a canal in New Hampshire recently, causing a flood which swept the country and threw 3,000 men out of employment. This would be a good time to propound to canal people generally that pregnant conundrum: "What is your opinion on rats?" And if so, "are the rats in favor of a new constitution?"

Well, as voting for these gentlemen "exactly right?"

WITH a new hotel enterprise in view, let us hope that the Frostburg quantity so far in this political camwater company will speedily make itself ready to answer any demand the proposed enterprise will make upon its resources. Without abundant supply of water it will be as useless to talk about a hotel as saloon without beer.

THE proposed new hotel enterprise is a fundamental hint to the town o Frostburg that it should resolve all its people into a committee of arrangements for a big business and real estate boom for 1888, a boom so big that even the presidential election either cut to help the other.
