Any of money to try to dig ditches. As for be placed in middle of street and not these can suffer enough dissolution to become removing the fire plugs every one knew less than 25 feet high. Carried. fracturing of the red shale is very consider- that water was very scarce and he Mr. Lammert moved that Council able and allows any water plain to deliver itself sideways to the surface.

I am sorry I cannot give you more precise and definite information. But the mere fact of your having so many firm springs at the outcrop of the red shale formation ought to inspire a reason able trust in the probability of a bore hole inside the basin affording water.

Yours respectfully,

J. P. LESLEY. Responding to the wishes of a number of citizens who united to defray his expenses, Samuel MacEachen, of Pennsylvania, came here Tuesday last to investigate the question of securing an increased water supply for the town by means of an artesian well.

The geological formation of Great Savage Mountain and the position of the springs on its west side were carefully examined; the location selected December that he wanted to be put on goods. for the proposed well on the East side new works and I told him it was im- W. A. Hitchins is in New York of the mountain noted, and the con- possible to ditch any then, but I would selecting the first spring instalment of clusion arrived at was that everything see that he would be put on before goods. indicated a splendid chance to secure the April quarter started. water by a well drilled to the red shale. He said that the supply would not be limited to what water was directly up the pitch of the measures from the well but that it could come from either side for long distances, as the red shale is full of cracks and seams in all directions, as noted in a letter of J. P. Lesley, State Geologist of Pennsylvania.

and several springs flowed from crev- Superintendent had procured.
