

Dear Sir - Yours of the 24th Ult. was duly received.
As our Monthly Report goes out this month, I acknowledge
its reception in this way. Your son is in good health,
& I may say to you, that his course here thus far
has been highly gratifying to us, and such as I prom-
ise well for him. His attention to study I believe
to be very good. The setting it down as good or very
might have been an oversight, & there may have
been a drawback in some department, which
I do not now recollect. He is in good health.

Yours
M. Caldwell
