

OFFICE OF  
**AMERICAN MANUFACTURING**

WAYNESBORO, FRANKLIN COUNTY, PA.

**SPECIAL ANNOUNCEMENT**

We recommend our three latest improved American Evaporators to our clients everywhere, namely:

**THE "PEERLESS," OR IMPROVED No. 2,** contains nearly double the tray face of our Standard No. 2, and is a great improvement over it. Price \$100.

**THE "ECLIPSE," OR IMPROVED No. 3,** contains nearly twice the tray surface of the Standard No. 3, and for all uses is the better and more economical machine. Neither of these improved machines occupy more space, except depth of evaporating trunk. Price \$200, with No. 3 Furnace; Price \$225, with No. 4 Furnace.

**THE "CLIMAX," OR IMPROVED No. 4,** contains nearly 1000 square feet of tray surface, requires no more room in building than the Standard No. 4, except in depth of trunk. It is furnished with two of our No. 4 Heaters, and, like the above improved machines, has the latest improved cut-off regulator. For its price it will do more work than any evaporator we know of in this country or Europe, and do it with less fuel. Price \$400.

**THE AMERICAN FRUIT EVAPORATOR**

The signal success of this evaporator, in a great variety of industries, may be accounted for by reason of its simplicity, ease of management, thorough ventilation, automatic circulation and low cost. It has won its way into every civilized country, and is universally admitted the simplest and most philosophical.

**ITS RECORD AND TRIUMPHS**

in every kind of Fruit, Berries, Raisins, Prunes, Tea, Coffee, Barks, Bananas, Copra, Peppers, Spices, &c., in the possession of its manufacturers are voluminous, and embrace every industry and country where merit is appreciated and fruits or vegetables grow.

**THERE IS NOTHING EXPERIMENTAL  
ABOUT IT.**

Its evaporating capacity for fuel consumed is greatly in excess of any other, its product the very highest in quality and market value, the cost per pound to make it less than any competitor yet found in this country or abroad; and its sales are in excess of all other evaporators combined, both in America and Europe, practically controlling the Fruit Evaporator trade in two hemispheres. For all tropical fruits and products it stands without a rival.

**ITS RANGE OF SIZES AND CAPACITIES.**

From Nos. 1 to 4 suffice for the wants of the family or small dealer to that of a commercial business, to wit:

**No. 0.**

Six feet long. Galvanized Wire Trays. Weight 200 pounds. Intended for family use or where a few bushels of fruit per day are to be evaporated. Price, \$25.00.

AMERICAN MANUFACTURING COMPANY.

EVERITTSTOWN, N. J.

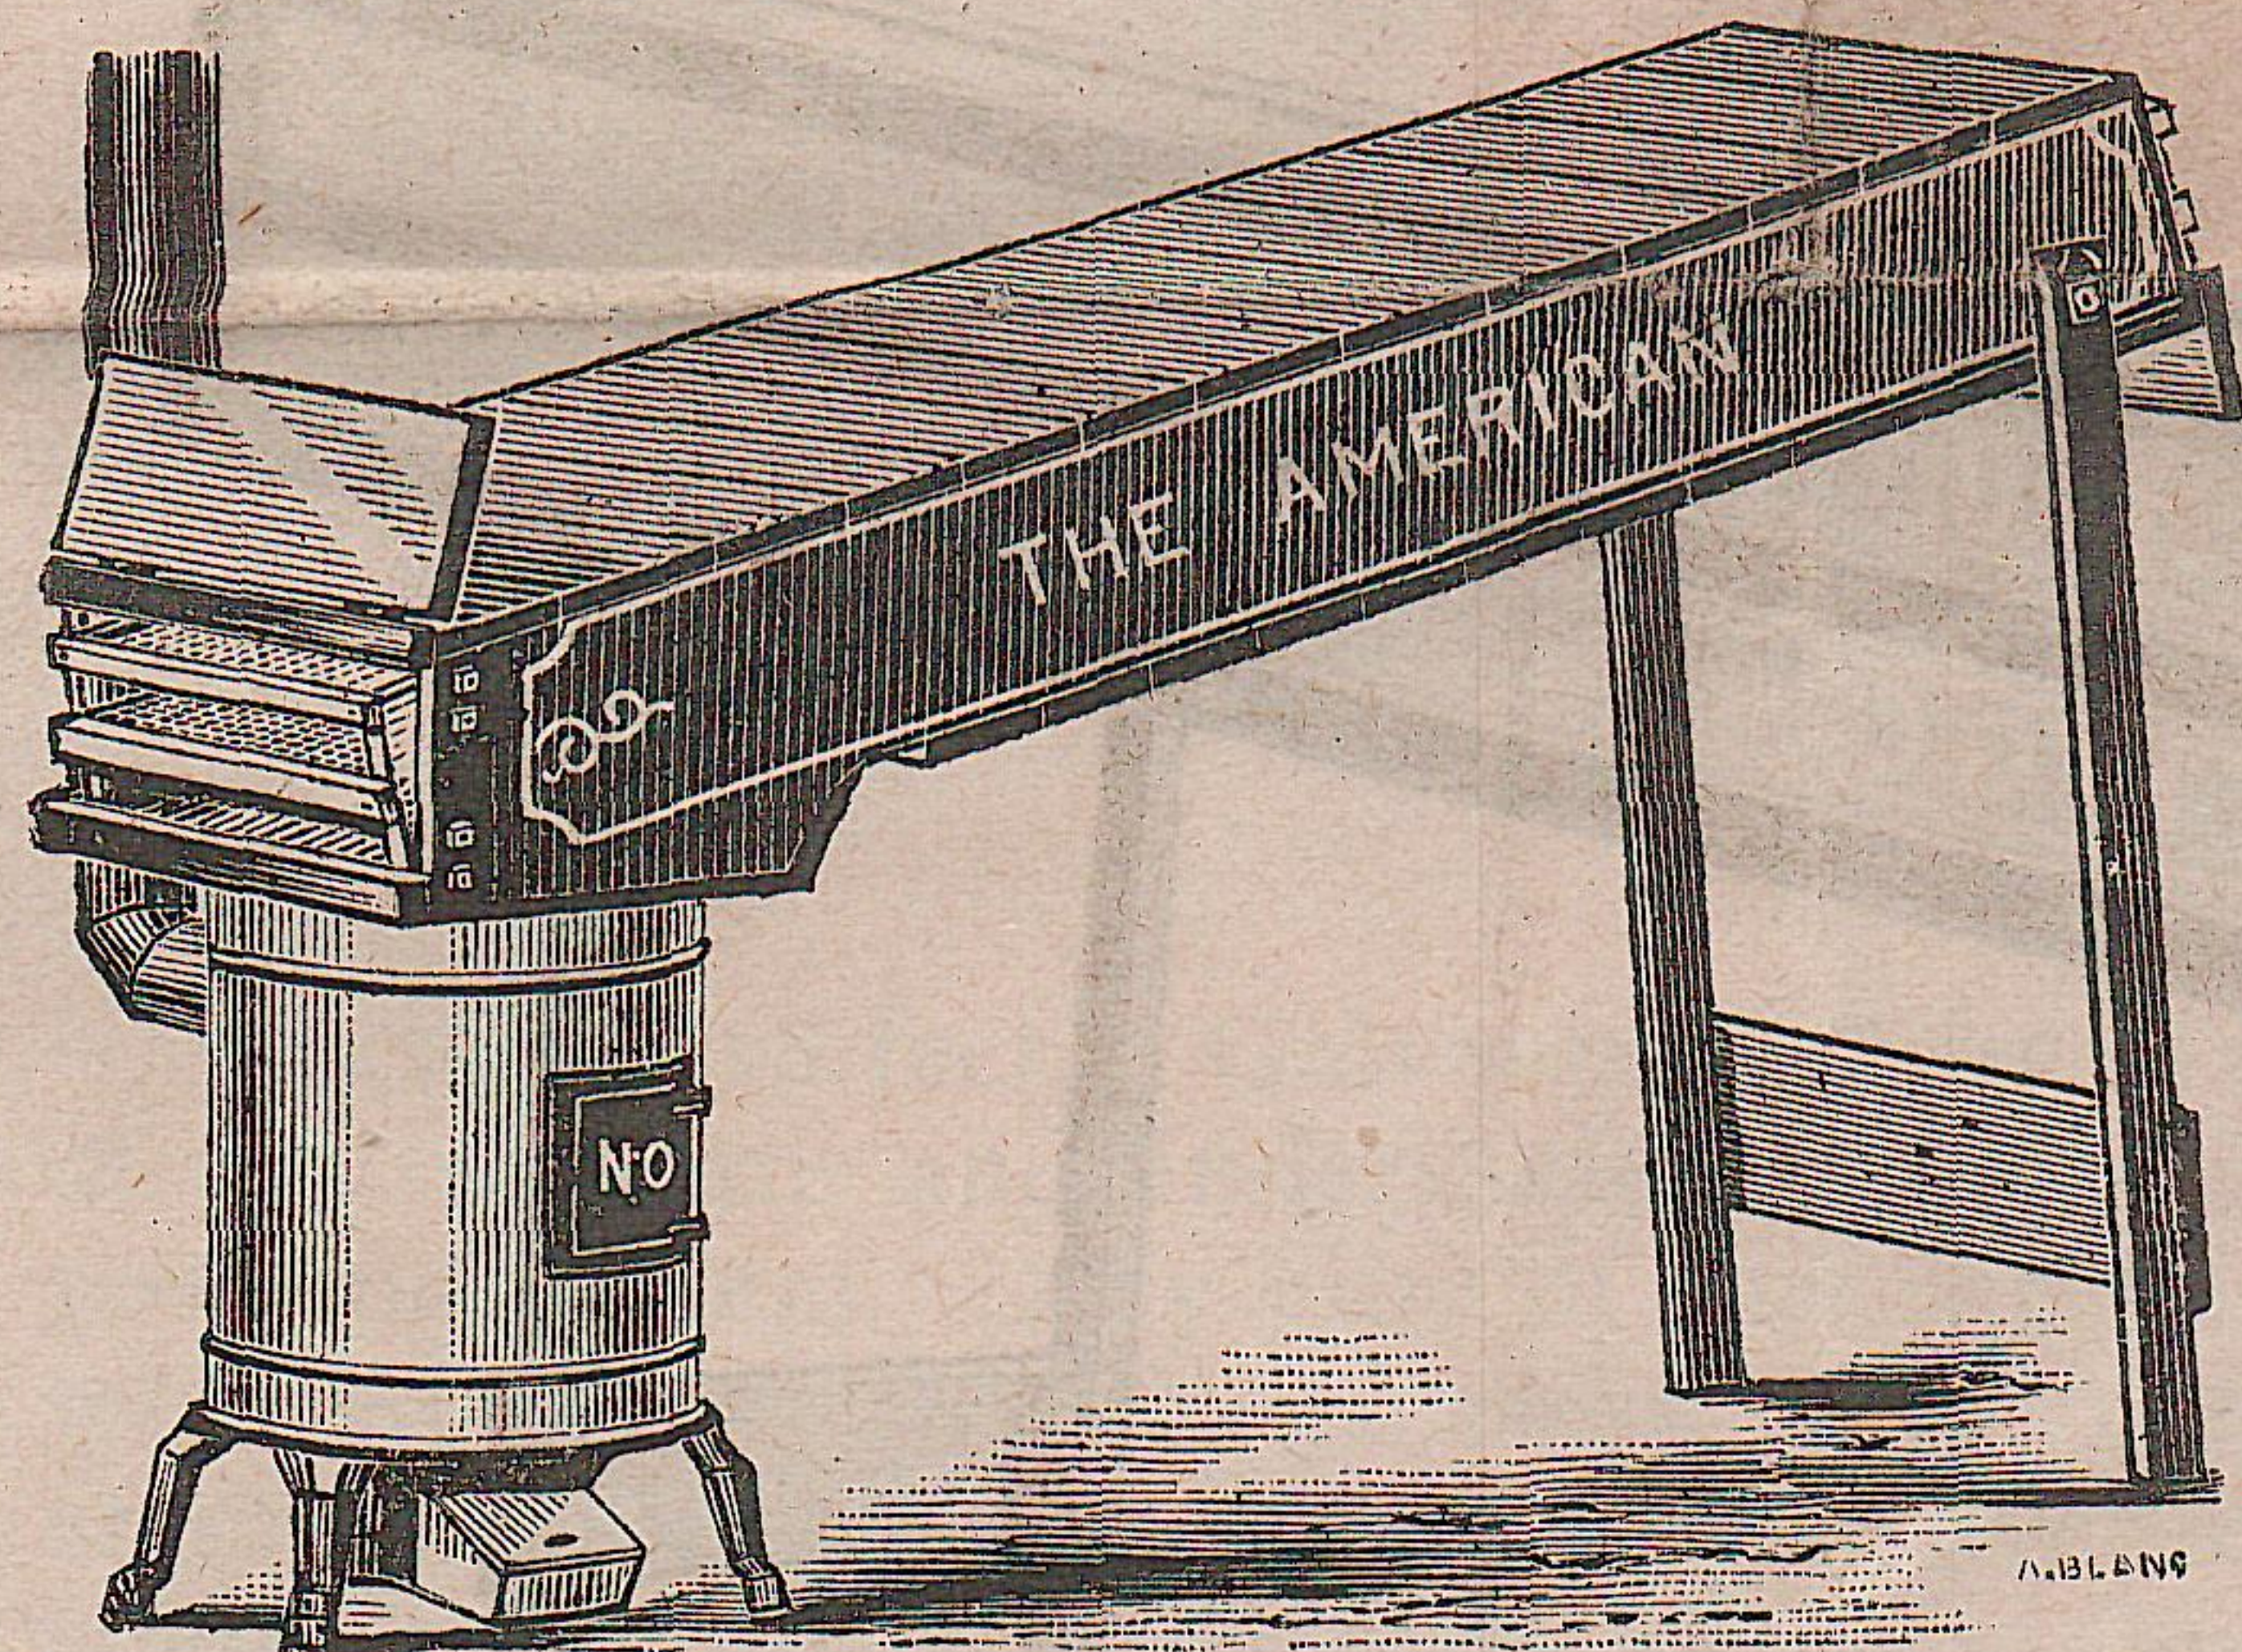

I have used one of your No. 1 Evaporators for the last five years and can recommend it very highly; where there is plenty of fruit I would recommend a larger size. I have sold my fruit for the last five years—pared, from 20 to 30 cents per lb.; unpared, 12 to 17 cents per pound. I consider the American Evaporator the best machine in the market.

Yours respectfully,

J. W. BLOOM.

**No. 1.**

Six feet long. Galvanized Iron Trays. Weight 350 lbs. This has about twice the capacity of No. 0, a little machine. One boy or girl can do required. Price, \$50.00

No. 0.
