

it is exposed on the west and south ends of the pit, but the short tunnels that have been driven apparently run through it in 5 or 6 ft.

Several pits have been dug and run up just up the hill across property line. Mr. Kruger feels more follows along the ridge & property line about 300 ft. south only a guess on his part. It had the appearance of titanium content.

Time
at present time leave it. the future work should other properties in neighborhood it would be using a rig to and several holes
