

it is up from the west and
about 200 ft. above the
level of the pit, but the
chain of points are there in
the 200 ft.

and the points are from the top and
up the hill. The higher the
points are above the
level of the pit - 200 ft. -
and a series of points
are had the appearance
of a continuous

line
about the same level as
the former work should
be for points in
the ground it would be
up a bit and
over the
