

whose names appear on said map?

MR. SMITH: Haven't you better say land, instead of deposits?

MR. WHITELEY: Lands.

THE WITNESS: It is a tracing of lands, not deposits. There are no deposits shown that I can see, on it. This is a photostat of a tracing, the original tracing of which, I believe, is in the office of the Commissioner of Lands and Mines.

Q You are familiar with the territory shown on this map, are you not? That is, that part of it that is marked in certain colors?

A Quite familiar with it.

Q Do you know, from your own knowledge, that those lands so marked, are owned by interests, whose names appear on that map or tracing? Or were owned at the time, I should say, that this map was made?

A The property Aurora and Lower Senarie, shown here, which were owned by me, over a period of some months, the property would be shown in green between these two properties. And the property on the other side, - that is shown on the other side in green, at that time, was owned by the Demerara Bauxite Company.

Q You have personal knowledge of that fact?

A I have personal knowledge of that fact.
