

MR. SMITH: Is that deposits or lands?
THE WITNESS: One thousand acres of land.

BY MR. WHITELY:
Q Do you know how extensive the deposits were on that land?
MR. SMITH: What of it, if he did?

THE WITNESS: I spent several days on it making
an examination. I don't remember at the present time what
my estimate was of the quantity.

BY MR. WHITELY:
Q Well, what did you do on this trip made in November,
1884, in connection with these Dutch Guiana lands?
MR. SMITH: I object to that as incompetent and
irrelevant.

THE EXAMINER: I will let him answer.
A I spent several days in examining the land and mailed a
report to Mr. Upham.

MR. SMITH: Is that report in writing?
THE WITNESS: The report was in writing.
MR. SMITH: It was in writing?
THE WITNESS: Yes.

BY MR. WHITELY:
Q Did you consider that there was a considerable quantity
of bauxite ore in these Dutch deposits?
A My recollection was that there was considerable ore,
part of which was of good grade.
