

Q Where is it located?

A I said located near the Corinth Canal.

Q How close to navigable water?

A I understand within a few miles of navigable water.

Q How many miles?

A I do not recall.

Q What would it cost to buy it?

A I have never had it offered to me.

Q Do you know the selling price of it?

A I don't.

Q How much per ton would it cost to mine it?

A I could not say without looking at the deposit.

Q What would be the freight charges to place it aboard steamer, handling charges, and carrying charges?

A The freight would be very low because vessels returning from the Mediterranean will move almost any heavy cargo as ballast.

Q That is several miles from water, isn't it?

A It is.

Q How much would it cost to transport it on land, to handle it and put it on board?

A I said in my opinion it is not bauxite.

Lawlor fol-
lows with
Cylinder 28.

Q Please answer the question, how much would it cost to transport it to water?

A I am not familiar with the freight rate in Greece.
