

Q The very material you are talking about and on which you claim to be an expert, how much per ton would it cost to put it on a boat?

A You are asking me to make a guess.

Q I am asking you for your opinion. If you have knowledge to justify your own testimony, you will be able to answer that question?

A I do not know the present rate of exchange of Greek money. I do not know the present wages in Greece; I cannot state that and you can't expect me know the wages of workmen all over the world.

Q Do you know how much it would cost per ton to transport that material by boat to Greece?

A Never have made an estimate.

Q Did you ever know how much it would cost to mine it?

A I do not know what it would cost to mine it.

Q Did you ever know?

A No, I have never known that.

Q Did you ever have any knowledge of the recoverable amount of bauxite per ton of ore?

A I have.

Q How much is it on that ore?

A I did not answer that question.

Q I thought you said "I have"?

A No.
