

A I cannot give you that figure without referring to records.

Q How far are they located from tide-water?

A Some of them are at tide-water and touch tide-water.

Q Do all of these touch tide-water?

A Well, foreign names are awful hard for me to remember.

Q Can you give us any names, some of them?

A Some in the vicinity of Splits, as they pronounce it over there.

Q Where is Spalato?

A On the eastern side of the Adriatic.

Q Where, with respect to north or south?

A I should say about half-way.

Q How many tons in this deposit?

A I cannot give you the tonnage from memory.

Q What would it cost per ton to mine it?

A Probably \$3.50 per ton.

Q \$3.50 per ton?

A It depends upon how far inland the deposits are. The ones I have in mind can be mined for \$3.50 a ton.

Q Is this one deposit?

A As I stated, there are several deposits.

Q Which one would cost \$3.50 a ton to mine?

A Any of these so uth of Spalato that come down to the water.
