

the water.

A Any of these no with of Spalato that come down to

Q Which one would cost \$2.50 a ton to mine?

A As I stated, there are several deposits.

Q Is this one deposit?

A Once I have in mind can be mined for \$2.50 a ton.

A It depends upon how far inland the deposits are. The

Q \$2.50 per ton?

A Probably \$2.50 per ton.

Q What would it cost per ton to mine it?

A I cannot give you the tonnage from memory.

Q How many tons in this deposit?

A I should say about half-way.

Q Where, with respect to north or south?

A On the eastern side of the Adriatic.

Q Where is Spalato?

over there.

A Some in the vicinity of Spalato, as they pronounce it

Q Can you give me any names, some of them?

A Well, foreign names are awful hard for me to remember.

Q Do all of these touch tide-water?

A Some of them are at tide-water and touch tide-water.

Q How far are they located from tide-water?

records.

A I cannot give you that figure without referring to
