

Q You just made a report here in the form of sworn testimony did you not? Now how much commercially available bauxite ore is there in the Country of Dalmatia?

A I know that when I went to try to buy ore there I didn't get very much.

Q Do you know how much there is there?

A Do you mean in the whole of Dalmatia?

Q Yes; about how much?

A I have said it probably runs into millions of tons.

Q How many millions?

A I didn't say "commercially available ore" though I said there was ore in Dalmatia.

Q I am trying to get you down to something specific?

MR. WHITELEY: What are you asking for?

MR. SMITH: The number of tons of commercially available ore in Dalmatia.

THE WITNESS: Available to the general public, to myself, if I wanted to go over there and buy?

Q Yes; if you know that?

A I don't believe there is any there available if I went there to buy.

Q Why?

A Because it has already been bought.

Q By whom?

A By various interested parties.
