

A I do not know.

Q You do not know the size?

A I do not know. If I did not know, I would not know the size.

Q Now, do you know the amount of Alumina per ton of bauxite that can be recovered from these deposits?

A It depends upon what deposits you are speaking of. It also depends upon the available solubility of the ore.

Q You say you don't know that?

A I don't know that unless I saw an analysis and unless I had some test whether it would be soluble.

Q Did you make any tests in Herzegovina of bauxite?

A I have.

Q Do you know the solubility of Herzegovinian ore?

A I do not.

Q Do you know how much alumina can be recovered per ton of bauxite?

A That is the same question you have asked me a number of times.

Q That is the answer, is it; you do not know?

A No, I don't make that answer.

Q Well, do you know?

A You are asking me something that is impossible to answer.

Q It is simply your opinion on this?
