

A Mr. Neilson, Mr. Davis and Mr. Larsen might tell you.

Q They will tell you quite to the contrary?

A The analyses of the ore don't give you the information as its solubility or availability. The analyses do not tell you how much alumina you can take out of those ores.

Q Do you know with that respect that there is not a single ton of ore in the interior territory of Herzegovina?

A I said I did not know the detailed information regarding Herzegovina.

Q How do you know there is any commercially available ore in Herzegovina?

A I don't believe Herzegovina is near enough to tidewater to make the ore of any interest.

Q In other words there is no commercially available deposits of bauxite ore in the Country of Herzegovina?

A I believe the freight rate would be too much.

Q Please don't interrupt the question.

A All right.

MR. SMITH: Read the question.

(Question read by the reporter.)

A I don't believe there is.

Q Let us take Montenegro. You know that country, do you?

A I do.

Q Is there any bauxite in Montenegro?

A I believe there is.
