Q How much?

A I cannot give you the figure; the tonnage figure on it.

Q I forgot to ask you who owns these bauxite deposits in Herzegovina; are they metal producers?

A I do not know.

Q Now then, coming back to Montenegro; you cannot give us the tonnage of bauxite ore in that country?

A I cannot.

Q Can you tell us where the bauxite ore is located?

A Located in the range of mountains that parallel the Adriatic Sea.

Q Is that the range of mountains from which that country gets its name "Montenegro", meaning "Black Mountain"?

A I don't remember that.

Q How far is the bauxite fromthe Adriatic Sea?

A I cannot give you definite mileage on that.

Q What is the size of any particular deposit you know of there?

A I said I cannot give you tonnage figures.

Q Have you said you can tell the amount of alumina that is recoverable per ton from that Montenegro bauxite?

A No one could tell that without analyses; without giving them a sample of the ore to try it.

Q How much per ton would it cost to mine that ore in Montegegro?
