have the interests of Emory & Company at heart.

There is a matter which I have in mind about which I have not previously written. It is the paper held by others on which Mother is an endorser. As soon as we are in a position to retire our own notes on which these other people are endorsers we should arrange to retire Mother's name from these other obligations as fast as they are renewed. We cannot of course do the latter until the former is accomplished. The farm will then be carrying only the two mortgages and the Wheeler Judgment. The whole proposition then will be simplified.

I shall be glad to hear further from you and consider with you any suggestions which concern the place, between us we are certainly due to save it.

Sincerely yours,

Ed

P. S.
The interest amounting to $54 on the Wheeler Judgment is due each year on August 18th but Edwin said it would be satisfactory to pay it any time before Jan. 1st, for the current year it has not been paid. I notice from the crop records of the farm that in recent years we have received no returns from apples and pears. These are by-products of the place which should be considered and while the amount involved is small yet we need all there is. I walked through the apple orchard and found there is only a small crop this year. The pear trees seem to have more fruit in proportion than the apple trees. When we arrange to get our share of these miscellaneous crops we may as well have an understanding as to just what crops we are entitled to a share of and then we will not have to take up the matter a second time with the tenant.
