Morgan, J. R. L., acknowledgments to.....	206	Oil feed, arrangement of.....	168, 169
Motor fuel, demand for.....	3	difficulties with.....	155
exports of.....	3	rate of.....	142, 149, 182
need of.....	4, 5	determination of.....	172
<i>See also</i> Benzene; Benzol; Gasoline; Naphtha.		effect of.....	137, 141, 198, 199
Moxham, A. J., acknowledgments to.....	136, 206	factors affecting.....	144-151
on life of tubes.....	191	153, 160, 171, 185, 198-200	
Moxham, Egbert, acknowledgments to.....	207	curves showing.....	144
Multiple-tube furnace. <i>See</i> Furnace.		Oil-feeding equipment, description of.....	168-170
N.		figure showing.....	170
Naphtha, production of aromatic hydrocarbons from.....	28	view of.....	170
cracking of, results of.....	183-185	Oil pumps, view of.....	170
yield of, from petroleum.....	3	Oklahoma oil, cracking of, products of.....	66,
Naphthalene, formation of.....	120, 122, 123	70, 71, 81, 83, 96, 189	
curves showing.....	124	curves showing.....	67-69,
reaction products of.....	108	71, 72, 82, 85-87, 97	
results of cracking.....	116	results of.....	60, 61, 151, 160
Naphthenes, physical properties of.....	209, 211	specific gravity of.....	87
Naphthene hydrocarbons, dehydrogenation of.....	26	curves showing.....	75, 76
in oils.....	27	viscosity of.....	77, 78
New oil-refining process, details of.....	13, 20	results of tests with.....	136, 138-140, 143, 146, 158
Nickel as catalyzer.....	14, 16, 17	specific gravity of.....	74, 96
Nikiforoff, Alexander, production of aromatic hydrocarbons by.....	28	Olefins, formation of.....	8, 10, 11
Nitration method of determining benzene, curve showing.....	93	physical properties of.....	209
results of.....	93	removal of.....	104
of preparing nitrotoluenes.....	103, 104	stability of.....	106
Nitrobenzene, manufacture of.....	105	Optime Motor Spirit Syndicate, cracking process of.....	16, 17, 20
Nitrotoluene. <i>See</i> Mononitrotoluene; Dininitrotoluene; Trinitrotoluene.		Overheating of tubes, results of.....	190
Noad, James, cracking process of.....	13, 20	of furnace, results of.....	155
Nobel Bros., production of aromatic hydrocarbons by.....	27	P.	
O.		Pamfilow, S. M., production of aromatic hydrocarbons by.....	28
Octane, physical properties of.....	89, 209	Paraffins, hydrocarbons in, specific gravities of.....	91
Ogloblin, W. N., on production of aromatic hydrocarbons.....	29	physical properties of.....	213
Ohio petroleum, hydrocarbons in, properties of.....	210	melting point of, relation of specific gravity to.....	213
Oil, burning. <i>See</i> Burning oil.		physical properties of.....	209, 210
cracked, apparatus for analyzing, view of.....	184	production of aromatic hydrocarbons from.....	30
cracking of, factors affecting.....	99	relative stability of.....	106
results of.....	56-65	Pennsylvania distillate. <i>See</i> Distillate oil.	
light, cracking of.....	183, 184	Pennsylvania oil, cracking of, products of.....	66,
recovered, factors affecting.....	65, 67	70, 81, 83, 96	
curves showing.....	67	products of, curves showing.....	67-69,
impurities in.....	161	71, 72, 80, 85-87	
removal of.....	161	results of.....	58, 59
production of.....	196	temperature of.....	6
proportion of.....	65-67	hydrocarbons in, properties of.....	210, 213
factors governing.....	65, 66, 194	recovered oil from, specific gravity of.....	87
specific gravity of.....	58-65,	curves showing.....	75, 76
74, 112-115, 156, 162, 199, 200		viscosity of.....	77
curves showing.....	75, 76	specific gravity of.....	74, 96
viscosity of.....	58-65	Petroleum, aromatic hydrocarbons from.....	26-29
factors affecting.....	77, 78	experiments with.....	121-125
use of, as fuel.....	IV	as source of aromatic hydrocarbons.....	24, 104, 105
<i>See also</i> Distillate oil; Header oil; Lubricating oil; Petroleum; and oils named.		chemical constituents of.....	1, 2
		consumption of.....	2
		cracked, analysis of.....	94
		crude, cracking of.....	5, 6
		<i>See also</i> Cracking process.	
		production of.....	2
		residue from, value of.....	185
		wastes of, causes of.....	III, IV
		prevention of.....	III
		<i>See also</i> Oil.
