Dover, Del., Apr 16th 1892

E. B. Emory, Esq.

Dear Edward -

Beetling died this morning, we have had an epidemic with the huts that affected them something like Army fever but seemed amenable to good treatment, but I suppose being weakened by age and just having a cold made her an easy victim, I had deferred handing over on account of sickness. Charley had in obedience of former instructions had the bugles mended the day I was away if she comes in again will send her over.

Will send May Bee over probably next week, Yours Truly, Geo. A. Millington
