

I have not thought any thing in regard to
travelling the River this and in fact
there is so much use for funds at
present - I can not rely upon the money.
I would thank you to visit me some
directions about - caring for the man.
I have not said he too far - and am
careful about giving cold water and
stead he fed at night - and do
as near as I know - how - but would
feel rather more satisfied to get some
advice from you. I hope you and
family are well. I have a case of measles
in mine but don't apprehend and thing serious.
I see your brother often and do some business
with him in my line as he lives in my
neighborhood, we get along nicely -

With kind regard to you and family

Yours very Resp.

Wm. G. Green
