down outside wall of leg truck. Mind
the fact that does the striking has nothing to do
with it, but on other hand the leg truck is
in wrong position which can be corrected
in manner stated. This applies to both fore
and hind legs. My little Angler Clay man was always
kicking behind, but has not touched since since lowered
on outside of truck leg. This is such a simple thing
that it is astonishing - but when the box it does
the work I saw my bro in law more - heavy outside
the wh shoes removed and simple plain shoes replaced
shod in the way and to surprise of all does not
kick at all. I did not intend writing you a
long on foot and shoeing, but get around
and from what has recently come under my notice
am convinced that facts of the lameness and
