

TOOTH AND FRAME FASTENING.

CHILDS & JONES

MANUFACTURE THE ONLY

Spring Tooth Harrow ^{ON} ~~THE~~ Market

THAT HAS NO COMPETITOR.

Self Locking Hinge.

In this advanced age of Spring Tooth Harrows, we consider ourselves fortunate to invent this solid and secure way of fastening the

FRAME AND TEETH,

without punching holes in them. The circle (or size) of the oval steel draft bars, are made about $\frac{1}{8}$ of an inch larger than the other parts, thus producing the **STRONGEST GRIP POSSIBLE** and is the foundation for the strength of our new harrow. Order sample Harrow and satisfy yourself. *SECURE AGENCY NOW.* Will furnish circulars, posters and electrotypes all you desire for advertising.

MANUFACTURED FOR

THE BIRDSALL CO.,
