

NATIONAL FEED BOXES.

Formerly Called "THE ECONOMY."

Saves Feed. Saves Horses. Saves Money.

THE NATIONAL FEED BOXES are made in two styles Portable and Stationary.

NOTICE.

If they will not do what is claimed here, instructions being followed, Return The Box and Get Your Money.

READ THE CLAIMS.

The Feeding of the most vicious, ravenous and greedy feeders is regulated completely by this box.

Choking prevented to a certainty.

The habit of cribbing never acquired when using the NATIONAL and many old cribbers are cured of the practice.

They insure the perfect mastication of food, and prevent indigestion and colic.

The horse cannot waste his feed, He is forced to take it in small quantities, and by so doing it is ground thoroughly, and hence he obtains the full benefit of it.

The NATIONAL saves feed in two ways.

1st. The horse cannot throw it out of the box, or take up large, mouth-fuls and waste it.

2nd. A less quantity of feed is required when properly masticated than when it is bolted, as can be done if fed in the old way.

These Boxes will save the Price many times each Year!

Manufactured Solely and for Sale by the

NATIONAL M'NF'G COMPANY.
