

RUSH PARK STOCK FARM,
INDEPENDENCE, IA December 11, 1891.

Gents:—The ECONOMY FEED BOX is the best thing of the kind I have ever seen
Please name me lowest price on two (2) dozen
Truly yours, C. W. WILLIAMS.

LOUISVILLE, KY January 2, 1892.

Dear Sirs:—Some time last fall you expressed us three of your FEED BOXES, we
having given your agent an order for only one; remitted for that one and wrote you that
we would return the other two. Since writing we have tested the box and find them very
satisfactory, and now remit for the balance, in full for the three boxes. Should have
remitted long since had we tested the boxes earlier, but not until recently did we put the
boxes up and test them. We recommend them very highly. Shall commence working
our racing stables sometime during February, and you may make ussay 1st. of February,
a price on a dozen boxes, and we may purchase them, and later on may buy boxes for
each horse in racing. Yours most respectfully,
SCOGGAN BROS.

THE CALUMET STOCK FARM.
CHICAGO, ILL., November 27, 1891.

Gentlemen:—We are in receipt of your new FEED BOX and after using it we take
pleasure in recommending it to horsemen. Its great feature is that one can easily remove
it after each feeding; we also like the ease with which it can be cleaned. The device for
preventing a horse from wasting his oats, and causing him to eat more slowly, is the best
I have ever seen. We have placed this one in Roy Wilkes' (2:08- $\frac{1}{4}$) stall, and shall
order more from time to time. Respectfully,
THE CALUMET STOCK FARM.
L. A. Davies, President.

LOUISVILLE, KY., December 19, 1891.

Gentlemen:—During the last meeting of Latonia I bought one of your PATENT ECON-
OMY FEED BOXES to try; and it has proved so satisfactory that you can ship one (1)
dozen with fittings. They are for the "Pastime Stable" Nick Finzer, Esq. proprietor.
You can ship to him; also mail him the bill. Respectfully,
A. G. NEWSUM, TRAINER.

CINCINNATI, O., October 1, 1891.

Gentlemen:—I have used the PATENT ECONOMY FEED BOX, and they are the best
thing of the kind I ever saw. A horse cannot eat too fast, nor can he waste any feed. I
think it is the only perfect Feed Box on the market. Yours truly
LOU. MERION, TRAINER.

LAIR, KY., September 26, 1891.

Gentlemen:—I have tried your PATENT ECONOMY FEED BOX, and I find it does all
you claim for it. It is the best box for bolting horses I have ever seen. It saves grain,
and the name is synonymous of the box. Yours respectfully,
WILL MEGIBBEN, TRAINER.

LEXINGTON KY., January 4, 1892.

Gentlemen:—I have used the ECONOMY FEED BOX, and I find it the best I ever saw.
It gives perfect satisfaction in every particular, and I recommend it to every horseman
and trainer. Most respectfully,
LEE JHRISTY, TRAINER.

EMINENCE, KY., January 5, 1892.

Gents:—Both of your letters received. In reply, being busy getting my horses together
and other hinderances prevented my answering sooner, I have this to say for your FEED
BOX: It is the best for a glutton in use, and is still better for a delicate feeder; thereby
making a combination no other possesses. You are at liberty to use this if it will benefit
you. Yours truly,
JOHN M. THORNTON.

OFFICE OF MARION COUNTY FAIR AND TROTTING ASSOCIATION.

LEBANON, KY., October 27, 1891.

Dear Sirs:—While at Lexington about ten days ago I saw on exhibition the FEED
BOX which I liked well enough to buy, paying for it at the time. My trainer has since
used it with considerable satisfaction. I am thinking of making some additions to my
stables this fall, and should I do so I would like for you to make me prices on a number of
your boxes. Very respectfully
T. H. CLELAND, JR.

LEXINGTON, KY., January 5, 1892.

Gentlemen:—I have used your ECONOMY FEED BOXES with the most satisfactory
results, and regard them as the greatest invention of the age for horses that are inclined
to be ravenous feeders, as they cannot possibly choke in feeding from this box or waste
any grain. Respectfully,
T. E. DRAKE, V. S.

Another gentleman breeder in Kentucky tells our agent that in four years his brood
mare had not had a natural passage, and that after a few days trial of this box in her
stall, he was greatly surprised to find that her bowels had been so corrected as to have
again become perfectly natural.

This was not his language; his was more expressive, but will not bear repetition in
print. **TURN OVER.**
