

jumping at pasture, was lame two or three days only, and now has been lame since. In a short while after she did it, the old Gypsies came along and persuaded me to use their remedy, which blistered the parts, leaving an enlargement. The other mare I purchased, or at least traded for of a gentleman in Norfolk Va, giving him Lottie of my pack. She beat the Orphan Boy in her first and only race. She was by Walter Morrill, 1st dam Sherman Morgan, 2nd dam Washington. She never had but little track work, but could show you a thirty five gait marsh any day in the week. I am not very partial to the Morrill, while they are very good, but not reliable, although they will do to cross with other good stock.
