

Register has gone down to Georgia to work on some rail road that is under construction while Pete is going to school this winter.

Dady is talking about putting me to work in some coal mine in West (Virginia) thinks it will be a good job.

Put a shot gun in my hands and some decays in the water and I will be satisfidd if a flock of ducks come along like ~~the~~ that flock that gave us the go by Friday morning.

Well Ed. I guess I will close now again thanking ^{you} once
